The A.C.Camargo Cancer Center is an integrated diagnostic, treatment, education, and research center internationally recognized in fighting cancer. In 2016, it performed 3.8 million procedures, graduated 89 new residents, and published 185 scientific articles. It has more than 50 specialties and 5000 professionals focused on the mission of “fighting cancer, patient by patient.”

“Implementing the steps defined in our strategic plan is vital for our growth. We can engage all teams collaboratively through the use of Project Online.”

Ricardo Geraidine
Corporate PMO Leader, A.C.Camargo Cancer Center

SITUATION
A.C.Camargo created a strategic plan in 2015 that consisted of 12 programs and more than 200 projects. The Cancer Center needed a platform to manage the projects in a way that supported team collaboration. It also wanted to provide reliable information about the evolution of each project to its Board of Directors to help inform their decisions. A.C.Camargo selected Project Online to achieve these goals.

BENEFITS
• Reliable information through better reporting and dashboards for Board of Directors
• Improved capacity planning and qualification of the resources of the projects
• Created visualization of the areas with high demand
• Standardized application of the corporate methodology of project management
