Enable Innovation: DEVOPS?

Everything as code

Application monitoring

Automate everything

Rapid feedback

Continuous Integration/Delivery

Rebuild vs. Repair

Application is always "releaseable"

What Are Containers?

It Depends on Who You Ask

Sys-Admins / Ops

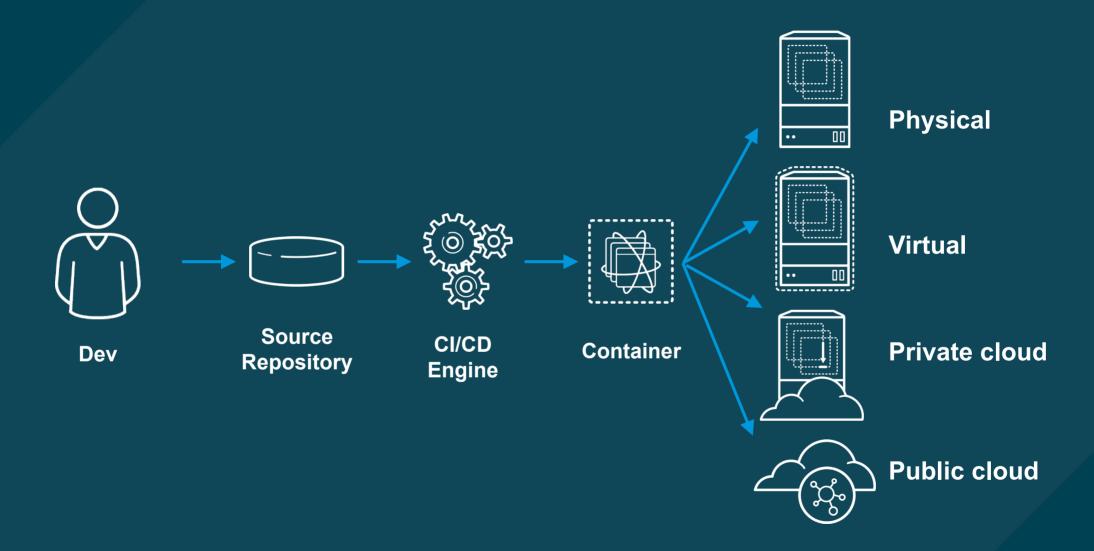

- Sandboxed application processes on a shared OS
- Simpler, lighter, and denser than virtual machines
- Portable across different environments

Developers

- Package my application and all of its dependencies
- Deploy to any environment in seconds and enable CI/CD
- Easily access and share containerized components
