Usage requirements

Thank you for your interest in including Bing in your materials. We want to make it as easy as possible for you to utilize these trademarks; however, to manage and protect the value of our brand, we have specific usage requirements.

A trademark use license is required in order to:
1) Use the Bing trademarks (the logo or icon alone)
2) Use the trademarks or name to indicate sponsorship or endorsement
3) Indicate a compatibility endorsement from Bing, such as "search with" or similar

If no agreement exists or if the proposed use doesn’t fall within the scope of your existing agreement, check if the use falls within the General Microsoft Trademark Guidelines and/or the Microsoft Corporate Logo Guidelines.

The Microsoft trademark can only be used in a way that accurately reflects the nature of the relationship between your company/product and Microsoft and adheres to the guidelines in this document.

Finally, if the use is not covered in any of the above or you are not sure, it’s best to obtain a specific, stand-alone authorization or license. Such license must be initiated and approved by the Microsoft business owner who you are working with. If you have a question, please consult your legal counsel or your Microsoft business contact.
Elements

Our brand name and primary logo are now simply Bing.

It's important to use the logo, icon, and other brand elements correctly when creating marketing communications.

Do not create additional lockups using the Bing logo or the Bing icon.

- **Minimum size**
  - **By height.** On screen, the symbol should never be smaller than 20 pixels tall. In print, it must appear at least 22" (5.5 mm) tall.
  - **By width.** On screen, the Microsoft logo should never be smaller than 72 pixels wide. In print, it must appear at least 1 inch (25.4 mm) wide.
Icon

This is the Bing icon. Use the full color icon wherever possible.

The icon must meet accessibility requirements. If you are unable to adjust the placement of the icon on the background, a drop shadow can be added to the icon to ensure the color contrast ratios are met. Use the following tool to test contrast ratio: Color contrast analyzer tool. For in-depth accessibility guidelines, visit https://microsoft.com/Accessibility.
Icon sizing, labeling and scaling

To maintain a clean, visually appealing layout consistent with Microsoft standards, keep a healthy clear space around product icons and the associated names.

Because of the vertical nature of the Bing icon, it requires additional consideration when being placed in a bounded space. Please follow the guidance for visual centering vs physically centering the icon in the space provided.

When paired with the product icon, the color of label copy should only be rich black, light gray, or white.

The label height should be about an eighth of the product icon height (X). The spacing between the product icon and name should be a minimum space equal to the height of the name font.
