

ABANCA is a major Spanish financial institution that provides retail and corporate banking services to 2 million clients. Based in the Galicia region, it manages 700 offices in nine countries and has 4,000 employees. The bank focuses on offering four pillars to its customers: responsibility, trust, quality, and innovation.

"A great advantage of Project Online is that senior management can get an updated report on each project and obtain a global view. Before, we invested considerable time and resources in creating reports, but now the process is quick and agile."

Juan Manuel Sánchez-Quinzá,
Director, Project Office, ABANCA

The ABANCA logo, featuring the word "ABANCA" in a blue, bold, sans-serif font with a double slash symbol to the left, all contained within a white rectangular box.

SITUATION

ABANCA wanted to improve the ability to manage its wide variety of projects. In an industry of constant change, ABANCA aimed to be flexible and adapt to market trends. It was already using Microsoft Project Server and decided to deploy Project Online to further centralize management of its corporate portfolio and improve ease of reporting.

BENEFITS

- Increased visibility into project status, timelines, and resourcing
- Improved ability to collaborate as a team and on projects
- Streamlined process for generating reports for senior managers

The aic logo, featuring the lowercase letters "aic" in a bold, red, sans-serif font with a white swoosh underline, all contained within a white rectangular box.
