

# Office configuration support matrix

System Requirements: <https://products.office.com/office-resources> | End of support resources for Office: <https://docs.microsoft.com/deployoffice/endofsupport/resources> | Last updated: October 22, 2020

## Full configuration support end dates

Support for Microsoft 365 Apps for enterprise is defined by the [Modern Lifecycle Policy](#), which requires customers to maintain an up-to-date configuration in order to stay in support. Support for non-subscription versions of Office is defined by the [Fixed Lifecycle Policy](#), which offers a fixed term of support regardless of configuration. However, the nature and extent of support available for in-support, non-subscription versions of Office running on out-of-support versions of Windows will depend on the nature of the specific issue. Learn more at: [Microsoft Lifecycle Policy FAQ](#).

	Microsoft 365 Apps for enterprise No end date	Office 2019 EOS Oct 2025	Office 2016 EOS Oct 2025	Office 2013 EOS April 2023	Office 2010 EOS Oct 2020
<b>Windows 10 Semi-annual channel</b> No end date	No end date	Oct 2025	Oct 2025	Apr 2023	Oct 2020

## Office 365 service connectivity support end dates

As of October 13, 2020, connectivity support to Office 365 services (e.g. Exchange Online, SharePoint Online, OneDrive) now requires Microsoft 365 Apps, Office 365, or non-subscription versions of Office in mainstream support. Learn more: [Microsoft 365 Apps for enterprise Updates](#).

	Office 365 Services No end date
<b>Microsoft 365 Apps for enterprise</b> No end date	No end date
<b>Office 2019</b> EOS Oct 2025 End of mainstream support Oct 2023	Oct 2023
<b>Office 2016</b> EOS Oct 2025 End of mainstream support Oct 2020	Oct 2023#
<b>Office 2013</b> EOS Apr 2023 End of mainstream support Apr 2018	Oct 2020
<b>Office 2010</b> EOS Oct 2020 End of mainstream support Oct 2015	Oct 2020

**How to use these tables (example):** I am running Office 2016 on Windows Server 2016. How long will my full configuration be supported by Microsoft? From the header row in the left-hand table, I find that Office 2016 will reach end of support (EOS) in October 2025. From the leftmost column in that table, I find that Windows Server 2016 will reach end of support in January 2027. Where that row and column intersect, I find that my Office 2016 client applications will continue to be supported on Windows Server 2016 until October 2025, when Office 2016 goes out of support. From the right-hand table, however, I can see that if I am using Office 2016 with any Office 365 services, I will no longer be considered in support after October 2023.

- EOS** = End of Support
- ESU** = Extended Security Updates
-  = Full configuration has passed end of support date

\*Beyond January 2020, Office 365 and Microsoft 365 Apps clients running on Windows 7 and Windows Server 2008 R2 (with or without ESU) will receive Office security updates thru January 2023. Learn more: [Windows 7 end of support and Microsoft 365 Apps](#).

†Office 2016, 2013, and 2010 clients running on Windows 7 and Windows Server 2008/2008 R2 (with or without ESU) will continue to get monthly updates through the end of the Office client's lifecycle..

#Although mainstream support for Office 2016 ended on October 13, 2020, Office 365 services will continue to be supported with Office 2016 until October 2023. Learn more: [Helping customers shift to a modern desktop](#).
