<td>Support for Microsoft 365 Apps is defined by the <a href="https://www.microsoft.com/microsoft-365/microsoft-365-and-office-resources">Modern Lifecycle Policy</a>, which requires customers to maintain an up-to-date configuration in order to stay in support. Support for non-subscription versions of Office is defined by the <a href="https://www.microsoft.com/microsoft-365/microsoft-365-and-office-resources">Fixed Lifecycle Policy</a>, which offers a fixed term of support regardless of configuration. However, the nature and extent of support available for in-support, non-subscription versions of Office running on out-of-support versions of Windows will depend on the nature of the specific issue. 2. Historically, new versions of Windows have supported Office products still in mainstream support (example: Windows 10). Although Office 2016 is in extended support, we making an exception to maximize customer access to the new Windows 11.
4. Office 2016 and 2013 clients running on Windows 7 and Windows Server 2008/2008 R2 (with or without ESU) will continue to get monthly updates through the end of the Office client’s lifecycle.
5. Although mainstream support for Office 2016 ended on October 13, 2020, Microsoft 365 cloud services will continue to be supported with Office 2016 until October 2023.
