Windows and Office configuration support matrix

---

### Full configuration support end dates

Support for Microsoft 365 Apps is defined by the [Modern Lifecycle Policy](https://docs.microsoft.com/en-us/office/client-management/office-2016-and-office-365/support-lifecycle), which requires customers to maintain an up-to-date configuration in order to stay in support. Support for non-subscription versions of Office is defined by the [Fixed Lifecycle Policy](https://docs.microsoft.com/en-us/office/client-management/office-2016-and-office-365/support-lifecycle), which offers a fixed term of support regardless of configuration. However, the nature and extent of support available for in-support, non-subscription versions of Office running on out-of-support versions of Windows will depend on the nature of the specific issue. Learn more at: [Microsoft Lifecycle FAQ](https://docs.microsoft.com/en-us/office/client-management/office-2016-and-office-365/support-lifecycle).

---

### Connectivity to the Microsoft 365 cloud services

As of October 13, 2020, Office apps connecting to the Office 365 services (e.g., Exchange Online, SharePoint Online, OneDrive) must be in mainstream support to be considered a supported connection. Learn more: [Office versions and connectivity to Microsoft 365 services](https://docs.microsoft.com/en-us/office/client-management/office-2016-and-office-365/support-lifecycle).

---

### Windows 365

As an online service managed by the Modern Lifecycle Policy, Windows 365 does not have an end of support date. Both Windows 11 and Windows 10 SAC are supported on the Windows 365 service, and the product timelines shown here apply.

---

2. Historically, new versions of Windows have supported Office products still in mainstream support (example: Windows 10). Although Office 2016 is in extended support, we are making an exception to maximize customer access to the new Windows 11.

4. Office 2016 and 2013 clients running on Windows 7 and Windows Server 2008/2008 R2 (with or without ESU) will continue to get monthly updates through the end of the Office client’s lifecycle.

5. Although mainstream support for Office 2016 ended on October 13, 2020, Microsoft 365 cloud services will continue to be supported with Office 2016 until October 2023.
