

DEFINING THE PROBLEM

Five Whys

of people have ideas in the shower.

What is it?

It's a technique children often employ to expose an adult's superficial understanding of the world. It's also a really useful way to get to the root cause of a particular problem. Taiichi Ohno of Toyota formally developed the technique in manufacturing. But, now, it's used in all sorts of industries to define problems.

How do you do it?

- 1. Identify a problem, write it up, and share it with your team.
- 2. Give your team five Post-it notes numbered one to five.
- 3. Get them to ask themselves why your problem is a problem.
- 4. Then, get them to ask why that problem is a problem.
- 5. Repeat until everyone's asked five whys.
- 6. Compare the answers and discuss similarities and differences.
- 7. Create a definitive list that best outlines the problem.
- 8. Organise a session to come up with ideas for solving the problem.

Why do it?

- You'll get under the skin of the problem.
- You'll understand the chain of cause and effect.
- You can then tackle the real problem rather than a symptom of the problem.

What do you need?

TIME

Up to two hours

PEOPLE

Three to eight

FUEL

Caffeine

MATERIALS

Pens and Post-it notes

ENHANCE

Microsoft Teams and OneNote

SUPERCHARGE YOUR STORM

Surface Pro with Teams

Can't get everyone in the same room? No post-its lying around? Try posting your whys on a Teams channel. Or write and share them on OneNote. You could even do it from a coffee shop – Surface Pro lets you connect from anywhere with 4G.
