

# CANOPY

## Manage

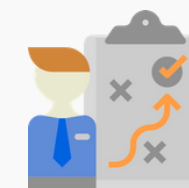

### Virtual Asset Management

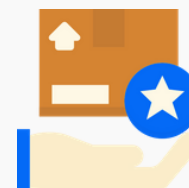

- Microsoft Azure and VMware Vsphere ready providing hybrid IT management

- Deploy and manage IT assets (virtual machines, PaaS services and networks) in both cloud and on premise using a simple to use UI

- Manage and control IoT and non-integrated physical and virtual assets

- Control IT costs and get transparency on spend which can be defined down to line of business applications

- Provide management control through role based visibility and alerts on environment changes potentially impacting uptime and availability
