

How to use your Kit

A guide from **PAPERBOYO**.

1.

Choose your cut-out design and pop it out

2.

Grab your Surface Go and turn on the camera

3.

Choose your location - I've made some suggestions!

4.

Line up your cut-out against the location, and take a photo!

5.

Print the photo and frame it

Paperboyo's top tips

Move the cut-out further away from the camera if the cut-out and landmark are out-of-focus

Use the camera on your Surface Go to take the photos, and then use the Windows Picture Editor to play around with editing tools

It's easiest to use the cut-outs with everyday items around the house – see how creative you can get!

Choose landmarks that have a clear background, so that the cut-out stands out

Take more than one photo, to have plenty of options
