

Using or considering Box with Office 365? Here's why OneDrive is a better solution for you

OneDrive for Business is included with all Microsoft 365 and Office 365 subscriptions. If you've been using Box as your cloud storage, sync and share provider with Microsoft 365, you may not realize that all the same benefits that Box provides and so much more are offered through the combination of OneDrive with Microsoft 365.

1 Unparalleled business productivity with an intelligent end-user experience

Collaborate in real-time with Office 365 across web, mobile, and desktop clients, with version history

Box only offers web coauthoring and limits version history¹

"It was exciting to see how much the users liked OneDrive after deployment. They really appreciate how the mobile app works so well with all the Microsoft Office applications. We've also freed up a lot of storage space on personal computers."

-Cole Weatherson,
Cloud Analyst³
TEXTRON

Securely share with people outside your organization via a simple email-based identity verification, no account required

Box does not have this capability

"OneDrive, the file storage and sharing component of Office 365, enables MGM Resorts to store files in one place so that employees can share them wherever they are. The migration to OneDrive is saving the company \$750,000 in annual license fees alone"

-Rodney Lee, Executive Director,
Product Portfolio Management Group²

Unlock the information inside your photos and images through automatic, intelligent tagging and text (OCR) scanning

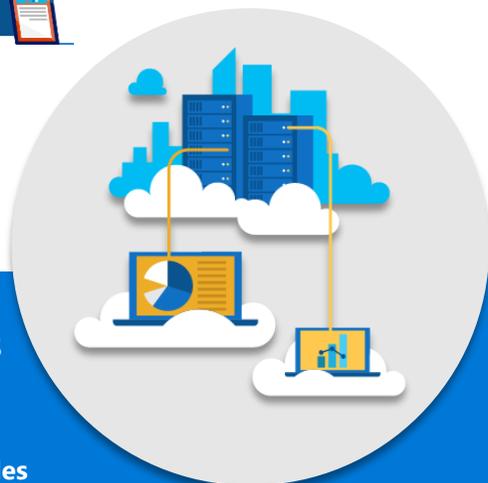

Box lacks this capability

Find the files that matter most based on your working relationships with others in Office 365 through the Discover View and Shared View features

Box lacks this capability

Easily share files in Outlook emails with cloud attachments

Box requires Outlook and Office plug-ins

2 Work seamlessly across any device, anywhere

15GB max file size uploads, built-in viewing for 320+ file types

Box has a 5GB maximum file size upload limit

OneDrive allows you to sync personal work files, and team files in SharePoint

Box offering lacks SharePoint sync capability

Access all your files with Files On-Demand in Windows 10 without having to download and use up storage space on your device

Box Drive only supports offline sync at a folder level, uses space on your device, doesn't provide previews, and doesn't work with the built-in search capabilities of Windows unless the file is downloaded

4+ star rated mobile apps on Android and iOS, with built-in intelligent scanning and cropping features

Box mobile app lacks built-in scanning and cropping features

3 Enterprise-grade service helps you stay secure & compliant⁴

Built-in end to end eDiscovery and Analysis

Box Governance add-on only allows you to collect and hold content. Separate paid 3rd party integrations are required to analyze, process, review and administrate data

Customer Lockbox to control data access

Box lacks this capability

Flexibility to create and customize 85+ types of global DLP policies

Box Governance add-on only allows you to create 4 DLP policies (SSN, CC, file type and custom words/numbers)

24/7 phone, web and chat support

Box only provides this level of support as a paid add-on

Recover from mass accidental deletion, corruption, or malware infection via File Restore

Box does not have the same capability

Data centers in 9 global regions

Box only has data centers in the US; it requires additional fees and relies on third-party solutions for other regions

¹Only Box Governance customers are entitled to unlimited version history ²MGM Resorts Customer Story: <https://aka.ms/MGM>
