Considering G Suite by Google? Here are a few reasons why IT leaders prefer Microsoft 365

Reduced silos

of IT controls

Microsoft 365 brings together the best of Windows 10, Office 365, and Enterprise Mobility & Security. Microsoft 365 offers a more complete, intelligent, and transformational service than what Google offers for the modern workplace with more robust security and compliance tools to protect users, devices, and data.

Less Complexity

A simple and unified management experience that spans the complex environments of users, devices, apps, and services

Fewer third-party integrations required to meet your needs

Fewer independent escalation resources to navigate

Fewer vendors to oversee

G Suite can require multiple third-party integrations to meet your needs, creating more surface area and complexity for you to manage

Lower Total Cost of Ownership (TCO)

Minimize TCO across deployment, management, and servicing

Lower administration fees with fewer third-party apps

Fewer integrations to pay for

Reduce help desk costs with enterprise-ready devices with a self-service experience

Fewer training costs due to familiarity of apps

G Suite's dependence on third-party apps and less familiar software can mean a higher TCO for your organization

> "We use Microsoft 365 Enterprise to foster a modern and highly secure workspace for employees empowered by teamwork and collaboration—everything we need to succeed in a global, digital market."

Bobby Berry, oom. SVP, Business Solutions²

Greater Flexibility

Realize the full benefits of Microsoft 365 regardless of where you stand on your digital transformation journey

Move to the cloud at your own pace

G Suite requires cloud-only deployments

Realize business value faster with FastTrack

G Suite offers no equivalent to FastTrack which provides a set of tools, resources, and experts committed to making your experience excellent

Onboard seamlessly and drive adoption

G Suite does not provide dedicated customer support managers to assist in launching and driving adoption within your organization

More Control

Your data belongs to you and you should be in full control over it

More control over where your data resides

G Suite offers only limited data location options (EU + US) and no sovereign data centers

More control to keep your devices up-to-date

G Suite limits the controls for IT administrators to ensure Chromebook devices are always updated

More controls over who accesses your data

G Suite lacks capabilities such as Customer Lockbox and Customer **Encryption Keys**
