

EDRMSaaS.cloud

Secure Information Management

Manage your information securely in iCognition's Document and Records Management 'as a service' cloud (EDRMSaaS), and get user friendly, on-demand access on any device, with intelligent analytics and governance.

Harness the information explosion, secure your content, meet your compliance/regulatory requirements, improve operational efficiency and lower your total cost of ownership with a simple monthly per-user cost!

Powered by class leading software; certified to the highest Australian Government security standards.

- ✓ Your content, managed to the highest standards
- ✓ Government certified secure Microsoft cloud
- ✓ Easy-to-use EDRMS

A winning combination: Microsoft Azure delivered, cost effective, best of breed performance and highly secure; Micro Focus' proven intelligent compliance engine; and iCognition's award winning products maximising discovery, access, sharing and collaboration, for both desktop and mobile users:

- ✓ **RM Workspace** - ease of access and collaboration
- ✓ **RM Workflow** - dynamic content workflow
- ✓ **RM Public View** - publishing and external access

EDRMSaaS.cloud is hosted on the Microsoft's Azure mission-critical cloud for Australia and New Zealand:

- ✓ Security and compliance certified by the Australian Government for Unclassified and Protected data
- ✓ Built for mission-critical apps supported by an open ecosystem of partners
- ✓ Full DR and backup regimes
- ✓ Can include Office 365 and Microsoft apps

EDRMSaaS.cloud can also be delivered from Australian-owned, secret-classified facilities of Canberra Data Centres, exclusively for Australian and New Zealand government and critical infrastructure sectors.

Not all clouds are created equal.

Transition to EDRMSaaS.CLOUD

Let us take the pain and cost of managing your existing information and information systems, while delivering a platform for the future with exceptional ROI.

We can identify, migrate and transition content to EDRMSaaS, including from:

- ✓ TRIM, Records/Content Manager, Objective or Opentext
- ✓ Network drives
- ✓ Exchange
- ✓ SharePoint, and
- ✓ Databases

We can also integrate your business systems, such as your CRM or Case Management System, to EDRMSaaS using our **range of connectors** in order to capture and manage vital information across your business.

This will decrease your existing internal storage footprint, provide you with a lower cost of managing your data, and reduce the cost of software licencing (e.g. Oracle databases). It will also provide better visibility of your information and make searching more efficient, thus saving money in responding to requests for information.

Additionally, managing your information in EDRMSaaS will:

- ✓ Better manage security and privacy of information
- ✓ Increase productivity for end users
- ✓ Deliver compliance and regulation risk avoidance

Our services are comprehensive, and our catalogue includes:

99.95% 24x7x365 availability

Full help desk services

Constant and incremental software upgrade

Full range of managed system and records management services

Business and strategic consulting

Solutions and integrations design and implementation services

For more information see [EDRMSaaS.cloud](https://www.edrmsaas.cloud)

Join our cloud clients by moving your vital information assets to EDRMSaaS.cloud: a superior service at a lower per-user-per-month cost; secure and leverage your information, meet your compliance and regulatory obligations, and streamline your IT and records management service provision.
