- Digital Divide
- Transparency
- Doing Business

"With this innovation, we will be able to provide a quality service to the residents of our city, saving them time and insuring transparence in our processes"

- Idriss El Azami El Idrissi Mayor of Fez

How Wraqi works, to achieve business benefits

Citizens can REQUEST DOCUMENT OR SERVICE

- Biometric authentication or 3D Secure reinforces trust in the transaction. There is also a web site that can use web cam or 3D secure to provide secure authentication.

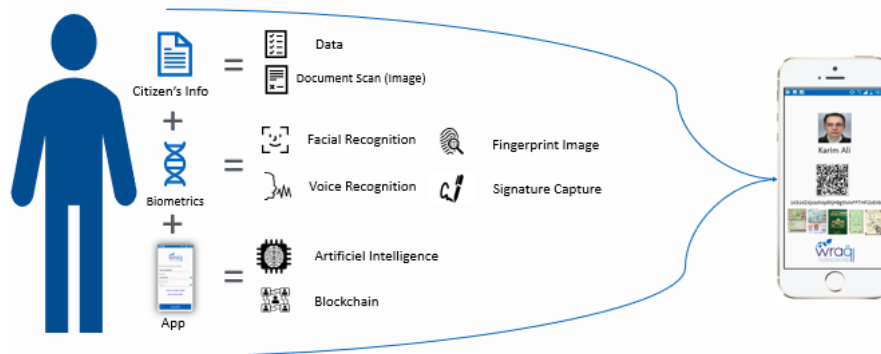

Agents process the request

- The agent can process the document or service request and sign manually the documents, then scan and upload them. Or digitally process them then sign electronically using class A3 certificate issued by the country's CA

Citizens can print at home or not!

- The documents can be printed at home, work or cyber-café. The QR Code makes them verifiable instantaneously with all meta data including administrative stamp fees

Desired Outcomes

- Reducing the Government spending, to assure citizens are alive or not in order to issue the retirement salaries.
- Digitally transforming the Public notary Offices where there is employees working manually.
- Introducing a website, mobile app and the IOT devices for the citizen to register their data.
- Digitizing Millions of Transactions/ Year which will reduce the OPEX.
- Saving citizens time and effort by digitizing the process.

Why Wraqi?

- We are already 5 years ahead in R&D, Development, Stabilization and lobbying. And Time to market is key.
- Current market players in biometrics + blockchain are focused on financial services. They are only providing tools for developers and so far no company is in our position or trying to.
