

Immunization Solution

A solution to **manage large scale** vaccinations programs

The **Immunization Solution** helps you to accelerate the results of investments in large scale immunization programs. The Solution provides key stakeholders with the oversight, insights and recommended actions that improve patient outcomes, drive consistent best practice clinic operations, and coordinate allocation of resources across the health system.

Who is the solution for?

Regional bodies, governments, policy-makers, funders and implementing partners, and private sector companies seeking to increase impact and improve outcomes from immunization programs.

We target the most critical issues

We focus on helping clients implement, monitor and manage the coordination of vaccination care delivering a consistent, coordinated health system execution, improved patient experience, to maximize health outcomes and address common implementation challenges:

- The **coordination of clinic activities and patient engagement** across facilities
- The capability to **implement immunization protocols**, consistently at scale
- The delivery of regular, on time, **program reporting** that helps to manage expectations of all key stakeholders
- The cycle of **adaptive management** that ensures stakeholders, health system managers and clinic staff are constantly learning and adapting

Our Solution

Expertise

Our staff help you to design and implement the best possible oversight and decision-making structures at leadership, stakeholder and clinic level. Our staff deliver change management support, combining training with active mentoring, with dedicated, embedded resources.

Accelerators

Our operational processes, and workplans accelerate time to value. Best practice immunization protocol toolkits, connected workflows, predictive and prescriptive algorithms for optimizing system and clinic management, patient engagement and managing supply chain in combination with benchmarking data sustain value during

Vantage

Technology

The Vantage platform serves as a personal virtual "Chief of Staff" providing tailored recommendations and supporting evidence connected to the step-by-step guidance that ensures demonstrable impact. This ensures consistency at scale, and through channels that stimulate engagement across all stakeholders including clinic teams and health system leaders.

Typical Improvements: based on a pilot implementation.

Management Effectiveness:

Monthly email alerts provide all stakeholders (USAID, IGAD and Ministries of Health) with synchronised and comprehensive view of program performance as a basis for resource allocation.

Operational Efficiencies:

Automated data ingestion, processing and report generation

Clinical Outcomes:

300% increase in vaccinations delivered within the first 2 months of pilot performance.

Our Approach

We believe in being a true partner to our clients, adopting their mission and objectives, and helping to evolve their internal capacity and capabilities. Our solution accomplishes this by using a comprehensive and cutting-edge approach combining our consulting team, our industry expertise, and the award-winning Vantage technology platform. We engineer operational clinic management and strategic client decision making practices and scale to deliver consistent execution through Vantage technology.

Project Timelines

Solution implementation typically takes up to three months and is followed by ongoing engagement dedicated to ensuring client program success.

Maximizing Your Results

	Coordination of care	Implement immunization	Program Reporting	Adaptive management
Solution outputs	Diagnosis, prioritization and recommendation for improvements in clinic operations and resource deployment	Embedded best practice toolkits that guide immunization and coordinated stock management and supply	Automated real-time reporting and oversight aligned to specific stakeholders requirements	Active performance monitoring and a continuous loop of analysis, learning and improved practices
Decisions support	<ul style="list-style-type: none"> How do we ensure that clinic capacity matches patient volume? How do we inform clinic management of improvements required to enhance patient care? How do we ensure that patients get achieve the full proscribed regime? 	<ul style="list-style-type: none"> How do we ensure vaccine protocols are followed consistently? How do we ensure sufficient vaccine stocks are available? 	<ul style="list-style-type: none"> How to deliver accurate reports efficiently and effectively? How to ensure key stakeholder are informed with relevant oversight? 	<ul style="list-style-type: none"> How to make agile decisions weekly or daily? When do leaders need to redirect resources or course correct? How do we learn from success and continue improving?

Why BroadReach and why Vantage?

BroadReach is a leader in global healthcare and is at the forefront of supporting stakeholders in the implementation of healthcare programs. Our approach has been developed through for nearly two decades of directly implemented large scale health systems strengthening programs across over 20 countries around the world.

BroadReach is currently leading a USAID funded consortium across sub-Saharan Africa through the Regional Action Through Data (RAD) program. RAD is a collaboration with regional economic communities: currently WAHO and IGAD. It aims to improve the use of data for regional and national health decision-making by aggregating and analysing disparate data to provide information for evidence-based action.

22
Countries
across West
and East Africa

BroadReach has the unique ability to combine proven expertise with technologically enabled processes to configure solutions that meet clients where they are, delivering enhanced performance and efficiency, empowering and magnifying their efforts to impact the populations they serve.
