

**Automate
your business's
processes in minutes**

**Accelerate the digital
transformation of your
company with CAP Workflow**

No matter what your business.

CAP Workflow is a process management platform that aims to simplify a business's day-to-day, reduce operation bottlenecks and make life easier in general. The platform has a dynamic approach and applications in every business model, from startup to multinational.

www.capworkflow.com

CAP Workflow increases your efficiency and reduces operating costs, leaving behind the paperwork, spreadsheets and e-mails.

"Who approved this? When? Where? Why? "

Have an approval history and be prepared for any audit.

"I did not know the process was stuck on account of me."

CAP Work flow facilitates the access and circulation of information, in addition to minimizing communication failures.

"If you could see my e-mail box, you would understand why I haven't had a chance to look at it yet."

Automation maximizes results, as well as reduces all types of waste: money, time, resources and energy.

"I would have approved it, but I needed to verify some information with the accountant."

Through the message board, you can check information with the associated department before proceeding with the request.

Cloud Access

Teams working collaboratively and simultaneously in the cloud. Simplify and accelerate the platform implementation. Manage your department or operation processes and optimize your time!

Low Code

Put your workflows to action in just minutes. All of this with an intuitive interface that requires little to no programming knowledge.

Customized Reports

The standard reports will support the questions in your day-to-day: How many workflows are ongoing? Which are the approvals that most delay business? Are the deadlines task execution being fulfilled? In addition, you can create custom reports by accessing CAP via Excel or PowerBI.
