Turn off resources when it is not used and save your money 60%

Set the days and time on the portal so that you can turn on or turn off the servers. Turn off resources out of office hours and reduce costs by up to 60%.

Monitor your costs daily

Monitor server consumption costs daily through the portal. Easily track your bills and payments.

Manage your backups

Your servers go back to the 3 points specified in the day and connect to the server as a second disk by selecting the date.

Start using Logo on Azure now

Running your logo applications on Microsoft Azure helps to reduce your costs, scale your services, stay safe with high-security backups, and start providing instant access.

Why Logo on Azure?

"Access from anywhere"

Logo Wings on Azure provides you with a secure, fast application infrastructure that is always on the go, accessible from anywhere. You just need to use it.

"You do not pay hardware and infrastructure costs"

The server you need is provided by the Microsoft Azure infrastructure under SLA assurance. You do not have to pay infrastructure costs like electricity, cooling, internet for your server.

"You will be safe"

You'll work on Microsoft's secure cloud platform, which has more security credentials than any other data center.

"You do not pay license fees"

Microsoft Windows and Microsoft SQL Server licenses are available with unlimited CAL (Access License).

"You will get tax advantage"

You can set out the services you receive as operational expense (OPEX).

"You do not pay backup and disaster recovery costs"

Your sources are backed up at different points. You can go back to 3 different points a day.

"You can scale your services"

You can increase or decrease the level of the hardware instantaneously during the required time to load the server.

"Pay as much as you spend"

When you are not using it, you can save up to 60% by turning off resources, for example, out of working hours.
