# THE #1 SOLUTION FOR USER GENERATED VIDEO - ON BRAND AND AT SCALE

Native Studios offers companies a Video-Framework to generate user videos for a broad range of use cases: from fan campaigns to product reviews or recruiting videos.

Use cases are translated into foolproof video-templates, which guide the user throughout the recording process and automatically combine the user takes with pre-produced footage, sound and branding.

INTUITIVE

In-app guidance via prompts and time-limits makes it simple for users to create video, leading to unprecedented conversion rates

BRANDED

Our rendering service automatically improves the user videos with branded content, sound and professional effects. In addition: The application of cognitive services allows us to search for keywords, capture sentiment or create subtitles.

SHAREABLE

The resulting videos are ready to share via the most relevant social channels or your own brand channel/ API-share.
