

QFlow Systems

QFlow Systems™ is a solution integrator that delivers the best of both worlds: An out-of-the-box Enterprise Content Management framework (document, workflow, and records management) called *Q-Action* and industry specific solutions that are easily configured and integrated into an organization's unique environment, objectives, and operating model. QFlow's paperless solutions run on premise or in the cloud, integrate and complement mission critical business systems, scale organization wide, and are backed by QFlow comprehensive Professional Services including Support, Maintenance, and Development.

QFlow solutions lower costs, increase productivity, and improve customer service for USDA, DITCO, Selective Service, Mayo Clinic, Ascension Health and many others and provide typical ROI of 1-3 years.

QFlow Solutions

QFlow has been a leader in the ECM industry for more than 20 years and offers a comprehensive Enterprise Content and Workflow Management Platform and Professional Services that support your digital transformation and help you build innovative solutions that are efficient and competitive. Only QFlow offers a complete set of enterprise content management capabilities to capture, protect, analyze, integrate, and engage content for greater insight and action....implemented quickly with Out of the Box standard functionality, On Premise or in the Cloud, Q-Action's Open Architecture integrates with document repositories and mission critical applications through a single, seamless interface and scales organization wide. Q-Action solutions facilitate standardization, scalability, visibility, and reporting.

Centralized Document Processing - Centralized Workflow for Standardization, Scalability, Visibility, and Reporting

QFlow's solution consists of centralized document routing workflows for paper, fax, email, and electronic files to standardize and streamline the storage of documents. This solution facilitates tracking and consolidation throughout the entire document lifecycle.

What others are saying about QFlow

Enhancing Customer Service in Single Family Housing

"The Single Family Housing team is making an innovative enhancement to the Guaranteed Loan Program that will improve Rural Development's ability to provide excellent customer service. Rural Development is working to establish a loan processing overflow channel to more quickly and efficiently process loans within the Single Family Housing Loan Guarantee Program." This enhancement is expected to eliminate backlogs, more effectively utilize our staff resources in the field, and help us become more predictable to our customers. Furthermore, we hope that eventually this system will serve as a model to improve our entire loan processing delivery system in this program."
