

# HiStruct Building Configurator

BUILDING CONFIGURATOR FOR STEEL CONSTRUCTION INDUSTRY

## HISTRUCT IS HIGHLY EFFICIENT

and modern web based application that helps you automate the engineering and sales process. Its customizable focus creates fully detailed 3D model – powerful and attractive visualization serves for both sales representative as well as the client to submit requests easily.

## DETAILED ENGINEERING DESIGN

HiStruct Building configurator enables you to focus on more valuable job as the rest is automated and saves you significant amount of time and energy.

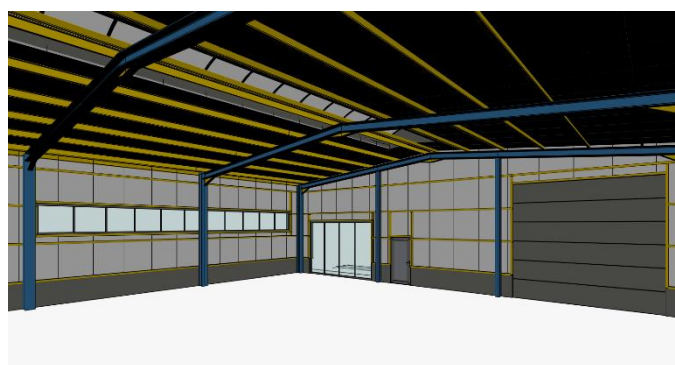

It brings quality configuration, analysis, optimization and outputs generations such as engineering report, overview drawings, bill of material, assembly lists and especially sales quotations.

## WIN MORE SALES

HiStruct targets to professionals who are striving to significantly decrease quotation lead times and eliminate rework.

HiStruct presents excellent sales tool that rapidly increase your profit as your response time gets lower. Client approval is based on real 3D model and minimize the time for order preparation. Moreover, generating variants is easy and immediate operation.

Various product templates are present based on sales case. This takes the user quickly to the desired result.

## QUOTATION

*"We satisfy people with solutions for their engineering problems. Our configurator helps them to be double-effective and brings them vast amount of new requests."*

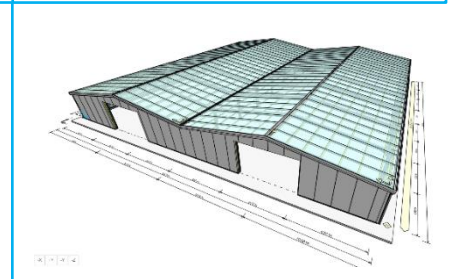

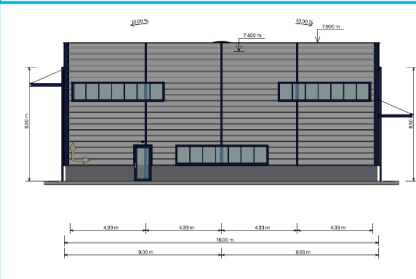

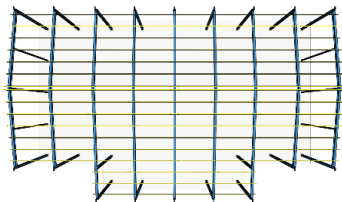

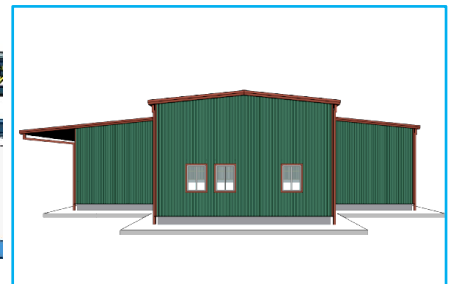

*Ing. Jiří Topič, Product manager and Co-owner, FemCAD Solutions*

HiStruct IS THE BEST OPTION FOR BOTH SMALL AND BIG COMPANIES

Gain extra with 3D visualization  
Increase quotation number  
Quick learning curve  
Multilanguage interface  
Generates numerous outputs

Reduce unpleasant rework  
Minimizes human errors  
No extended lead times  
Stops depressed revenues  
No confusion about versions

We develop easy to use software tools that involve **3D CAD MODELLING**, engineering **DESIGN** and various structural optimizations. Our solutions are made to fulfill unique client requirements and to address all specific conditions in order to guarantee the solution suits the client needs perfectly. You won't waste your time with boring standard **CONFIGURATIONS**. Better get involved in later stage of the sales process that brings higher efficiency in closing deal.

HiStruct uses **BUILDING TEMPLATES** that allow variety of adaptations at the level of building shape, structure elements, sheeting panels, openings, accessories or color schemes. Numerous **REPORTS** automatically generate bills of material, building views and drawings.

Interactive response modelling ensures immediate **VISUAL FEEDBACK** and minimizes the effort to understand client needs. Application is available from anywhere and shared link offers the user to walk through the model and get excellent **IMPRESSION**.
