

Compass Asset Finance

With full electronic document management and processing it's a best in class lending solution

ABOUT

Scalable and proven, our loan origination system (LOS) is capable of handling hundreds of thousands of applications per month and collect data from many industry standard data sources. With full electronic document management and processing it's a best in class lending solution.

Compass Asset Finance (CAF) is a loan origination system developed to streamline and facilitate the processes of crediting, auditing, funding and income verification for financing applications received from dealers.

CAF supports self-configurable credit decisioning, tolerance limits and risk parameters with full auto decisioning & scorecard capabilities.

All of our solutions can be brought together in a single seamless and branded platform that can be opened to external partners and customers.
