

Inter – Face: Core Banking Solution

Intertech offers Core Banking solution, ***inter-Face***, to leverage your current capabilities while increasing both service level and operational efficiency by combining over 25 years of banking experience. The solution supports all type of business lines with a scalability from one branch to thousands of branches with hundreds of millions of transactions per day. Intertech has a solution set including ***BPM, CRM, omni-channel*** etc. which can all be integrated into core banking if desired. Thus, inter-face can be called bank-in-a-box.

The solution is the first core banking software developed with Microsoft technologies (.NET framework and SQL Server database)
