Quality Assessment and Accreditation System

The system for quality assurance and accreditation is designed to support continuing quality improvement and to publicly recognize programs and institutions that meet required quality standards

What is QAAS ?

A highly customizable assessment and accreditation system that allows the input of any set of standards, sub-standards, and good practices to fit any industry. Quality Assessment and Accreditation System (QAAS) enables institutions and organizations to self-evaluate their performance against their industry's standards or against industry benchmarks.

Why customers use
QAAS ?

- Integration with KPIs and survey systems
- Ratings & weights management
- User Management
- Benchmarking
- Using different statistics methods Panel's cumulative ratings and weights are calculated. QAAS also reports standard deviations of ratings to show the accuracy

Improved organizational alignment and communication

- Common language
- Common set of strategic objectives
- Common metric structure

Simple Scorecard User Interface

Better strategic planning

- Create Initiatives to improve performance as well as monitor their progress and change.
- Manifesting the "Cause and Effect" concept that separates the Balanced Scorecards solution from other performance management systems

University Organization Chart including Programs

Improved performance reporting overall

- Detailed performance and achievement reporting on the Department level as well as on the organization level to give a holistic view of decision makers

Integrate with KPI's and Survey systems

The objective is to ensure good international standards in all post-secondary institutions
