

Your Use Case in Real Operation.

Reach your goal in safe steps.

Test drive your individual applications → without the risks of a full-scale project.

Use the ① **Free Test Account**, the ② **Project Workshop** and a ③ **Proof of Concept (PoC)** or a pilot to test the mobile application of your business processes using HybridForms in your real-life environment – with your own tailor-made forms and, optionally, integrated into your systems. You just need mobile devices, but neither special servers at your site nor any IT installations.

This tiered and agile procedure ensure low risk planning by quickly taking actions based on knowledge gained in real-life situations.

For realistic results and valuable practical experience – without all the risks of a full-scale project.

① Test Account with many ready-made Form Types

We set up HybridForms for you and activate **access for one user**. You test the mobile usability with several ready-made forms – close to your application scenario. So you can take the advantage of advanced features such as PDF, server data synchronization and biometric signature in **real life use**.

During this test period, you'll gain experience how well HybridForms runs on your mobile devices can support your own processes.

Test Account: free of charge

Included are:

- » Setup of your user account as well as a test license for 14 days
- » Apps for iOS, Android, Windows & Web
- » HybridForms Designer for creating your specific form samples (offline/local)

② Project Scenario and Analysis Workshop

In the analysis workshop we support you, starting from your existing (paper-based) processes. We look at your procedures and requirements in detail - and yield our many years of expertise from **many other customer projects**. Together, we analyze your different use cases and business processes for specific and **meaningful digital feasibility** with HybridForms. Data sources and information flows as well as needed **system interfaces** are examined, in addition to the requirements and real-life applicability from the point of view of your team – as well as suitable **mobile devices**.

The following questions will be answered in the workshop:

- ✓ Which **current problem areas** can be **improved immediately using a digital solution** and in which steps can they be solved?
- ✓ Which existing **risks can be reduced systematically**?
- ✓ Which **positive effects** can be achieved regarding **saving** unnecessary activities and costs as well as **improving quality**?
- ✓ How **time-consuming** is the change process or implementation? What are the **costs** and how quickly will this **digital transformation** pay for itself?
- ✓ **Your benefit:** Realistic planning for your mobile business processes, digital feasibility & economic efficiency gains.

Scoping Workshop: € 1.200*

Value of € 2.400

* These costs will be **discounted** in a later full project order.

Included are:

- » **Workshop setup** with preliminary coordination (web conference) and comprehensive preparation with references
- » **Execution** of the workshop with 1-2 consultants from icomedias and your key decision makers for the duration of 3-4 hours **at your company site** (optional travel expenses)
- » Follow-up incl. written summary of the results

③ Proof of Concept – Servers, Apps und Your Real Forms

A PoC is testing of main functions in practice. You select from your existing (paper) forms and then create your individual form template/s with the intuitive HybridForms Designer yourself. Or we do it together with the support of our usability experts.

Our team will support you with training and assists with concept, design and digital implementation.

We'll set up HybridForms for you and activate **access for several users**. Your staff can work with your own in-house forms and can use advanced features like PDF, data sync, group access, images with annotations and biometric signatures under **real life conditions**.

A PoC runs for **several weeks**. During this period, you can verify how well HybridForms meets the requirements of your processes – and especially the **daily added value** for your users.

- ✓ **Your benefit:** No-fuss start, you don't need any internal IT servers, because servers by icomedias or Microsoft Azure cloud are used. You just need to provide mobile devices for your team.

PoC-Package: € 4.800

Value of € 7.200 minus € 2.400 discount by icomedias for server, operation and licenses as a part of the expenditure. In return, icomedias may name the customer with logo and PoC title (without details).

Included are:

- » Project setup, setup of access for **5 user accounts** as well as test licenses and server system for **60 days**
- » Setup our your PoC as System on **HybridForms Server for SQL Operator Edition** including **admin access** for you
- » **Operation** on servers by icomedias or Microsoft Azure in the cloud
- » **Training** for designing forms, usability and making templates as well as administration of 8 hours
- » Flexible **support pool** of 16 hours

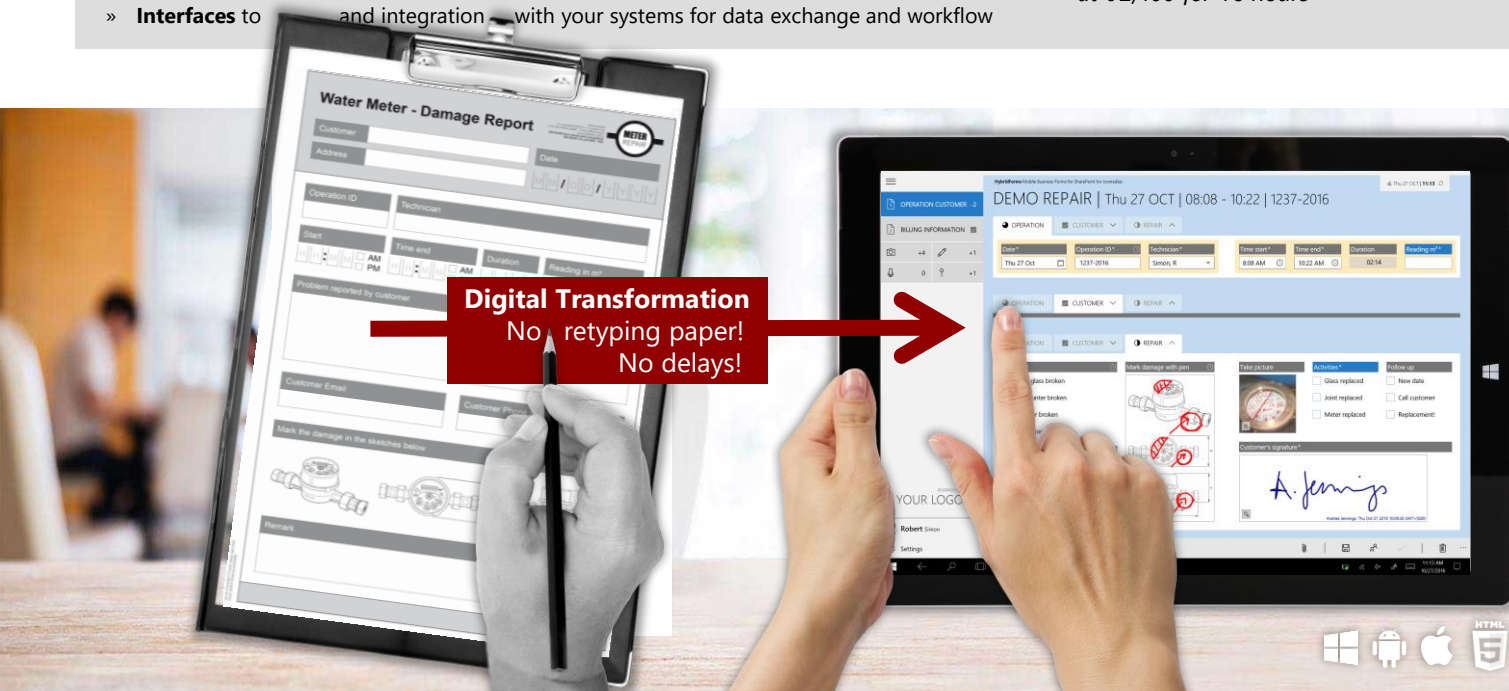

Optional: Additional packages for support

- » Joint design and technical **implementation of forms** by icomedias
- » Expansion of the PoC (test of main functions) to a **pilot project** (small regular operation)
- » Installation on your **own servers** or **your own Azure cloud** – instead of icomedias systems
- » **Interfaces** to _____ and integration _____ with your systems for data exchange and workflow

Add flexibly:

Further support is possible at any time, it is your choice:

Support pools
at € 2,400 for 16 hours

Benefit from the security and sustainability of a Proof of Concept

- » **Safe preliminary project:** Results from a PoC go directly into planning for your production project and reduce risks. Your assumptions can be pre-tested, and errors avoided.
- » **No purchase risk:** You can test without having to purchase licenses.
- » **No need for internal IT infrastructure:** The PoC runs at icomedias or with Microsoft Office 365, meaning your in-house IT does not need to provide internal servers.
- » **Real-world conditions:** You can test all components in your daily working environment – from devices, handling, to system interfaces and data exchange.
- » **Sustainable investment:** Numerous services provided as part of the PoC, e.g. the design of the forms or interfaces, can be used in a follow-on production project and reduce costs.
