# What is e-Drive

eDrive is a secure file hosting service, operated by Azure Microsoft.

It allows users to store Jean files **to manage and optimize the laser production**. The service provides its users the ability to store Jean files on remote servers to download and share them with authorized users.

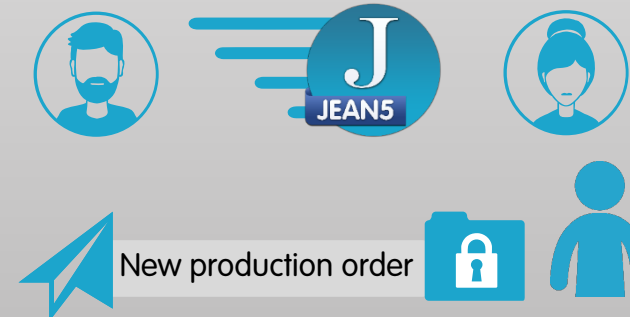

You can upload  
your designs

Organize them in folders  
and subfolders

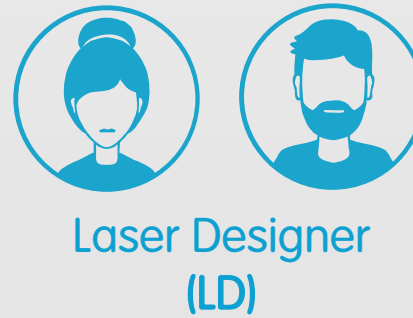

share with other users  
& create production orders

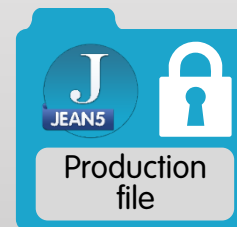

Manage  
laser production

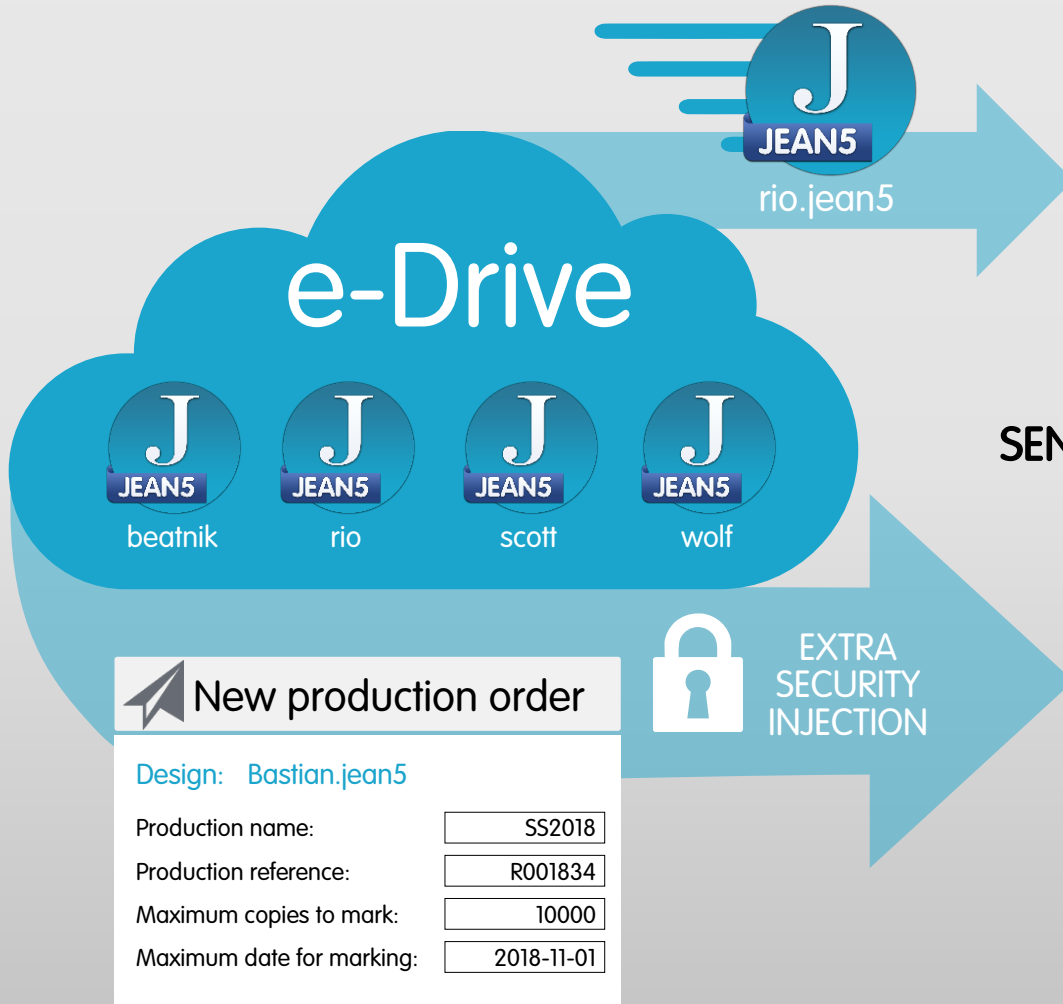

## SHARE FILES BETWEEN USERS

## SEND PRODUCTION ORDER

Laser Finishing  
Production Manager  
(LFPM)

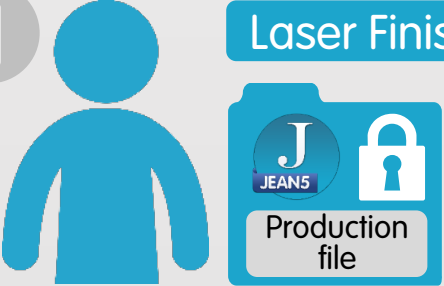

Brands or Vendors

# New production

**1** **Laser Finishing Production Manager**

**Creates a new production file**

- Select .jean5
- Decide number of copies and deadline

**2** **Laser Finishing Production Manager**

**Assign and manage laser production**

**New production**

Design: Bastian.jean5

Production name:

Production reference:

Maximum copies to mark:

Maximum date for marking:

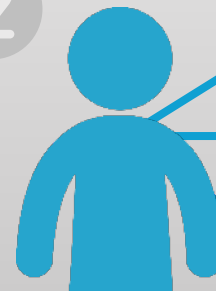

**1**

Laser Finishing  
Production Manager  
(LFPM)

**2**

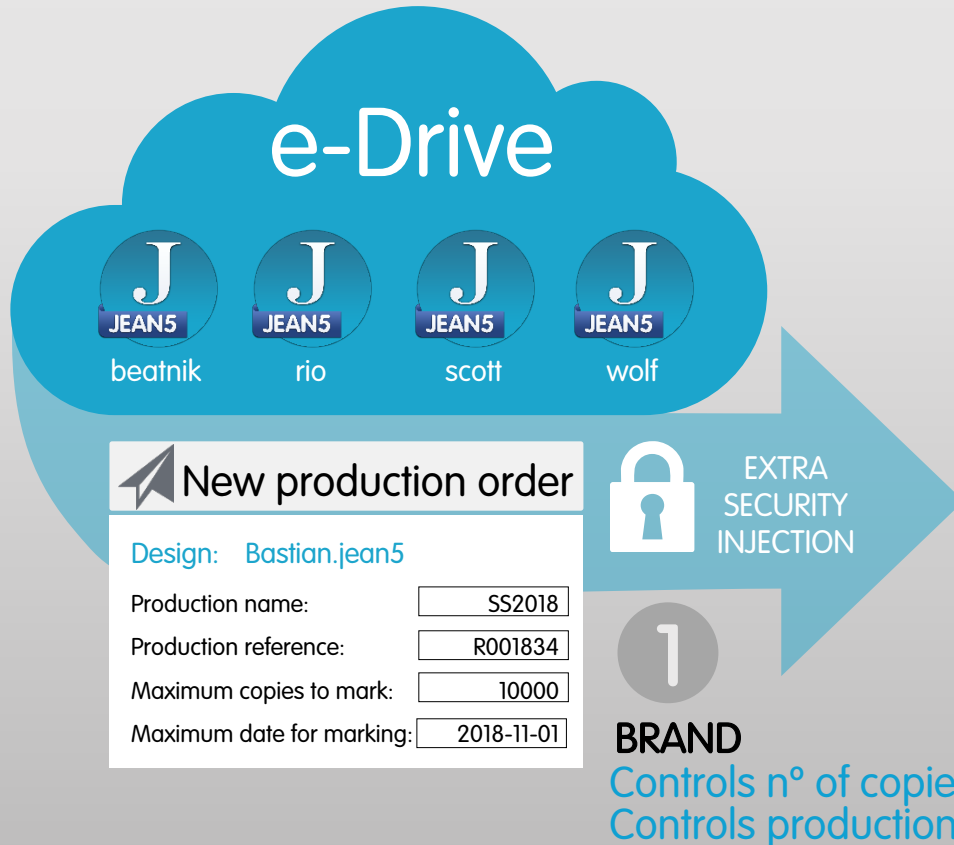

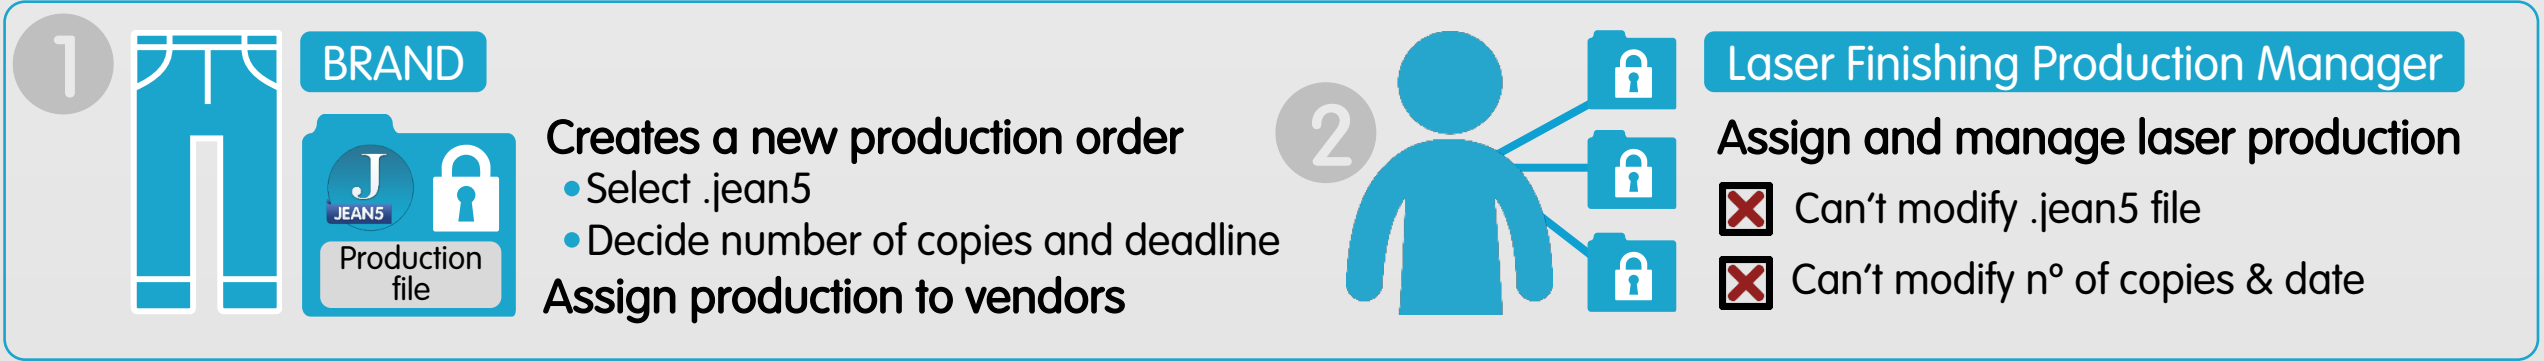

Controls n° of copies to be marked  
Controls production deadline

**LASERS  
e-Mark**

- ✓ Can adjust design
- ✗ Can't modify n° of copies
- ✗ Can't modify deadline production date

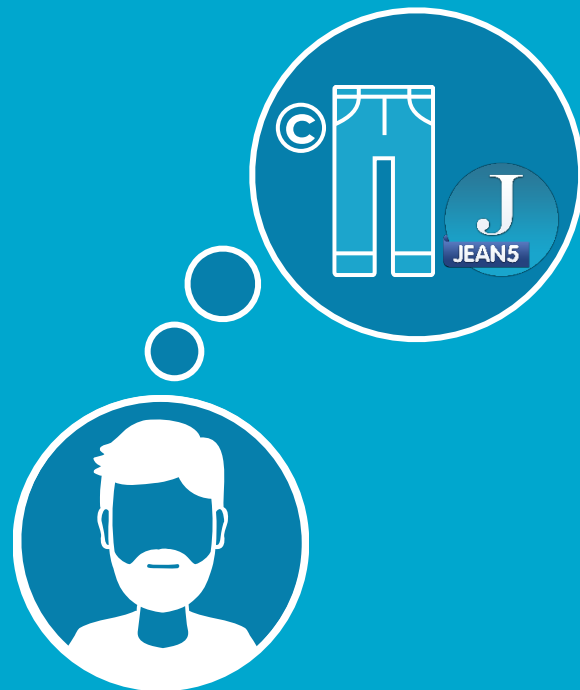

# New vendor order production

# KEEP YOUR IDENTITY UNIQUE & SAFE

You manage your  
**designs**  
and the  
**final look**

.....

Protect your  
**Intellectual Property**  
with extra security injection

.....

Build a secure and simple system  
share production orders with your  
vendors base

.....
