CONTENT MANAGEMENT

# Why an Enterprise Video Platform (EVP)

An EVP (Enterprise Video Platform) is a robust video asset management platform that empowers enterpriselevel video applications including:

## Webcast

Showcase your business’s latest accomplishments, engage with your audience, and leave a lasting impression with virtual press conferences, company meetings, and shareholder updates.

movingimage’s webcast solution features include presentation slides and a chat feedback channel.

## CorporateTube

Easily create your own corporate YouTube-like video portal that enables employees to access an entire video content management platform through a single point of entry.

## Mobile App

The new VideoManager Pro App allows you to manage and share your videos anytime and anywhere from your mobile devices. Easily upload videos, adjust upload quality to the available bandwidth, edit your metadata, and publish.

## Why movingimage

We are...
