Cloud Management Portal for Microsoft Azure

Govern Your Cloud Spend, and Optimize Azure Usage and Planning

View Dashboards, Not Spreadsheets

Usage administration and financial analysis of billing data for a growing number of Azure services can get complex at the enterprise level. The dashboard and reporting features in the free New Signature Cloud Management Portal can reduce cost, help avoid surprises, and maximize efficiency.

Manage Azure Usage and Plan Capacity

Get meaningful trend insights for budgeting and capacity planning. The Cloud Management Portal helps you better understand your future usage needs by giving you custom views and reports on current and past usage. All you need is an Azure Enterprise Agreement and a Microsoft account.

Get Crystal Clear Billing Transparency

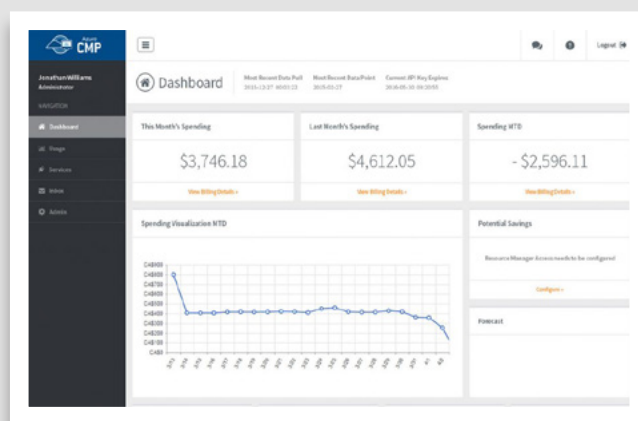

Manage all your Azure subscriptions using one simple interface. Easily identify peak usage and view costs to enable chargeback and showback for all Azure subscriptions. You can create notifications and custom billing reports to enable optimal cost management across your organization.

What Our Clients Are Saying

“New Signature’s Cloud Management Portal is very helpful because it shows us the specifics of Azure billing and usage by department, and also allows us to make better planning decisions. For example, I am now able to easily show to management why moving test/dev to Azure is very cost-effective.”

Robert Welsford
Manager of IT & Network Operations
Morrison Hershfield
