Traditional tools and processes don't work

Applications

IaaS

PaaS

SaaS

Problem Statement

On premises security products don't support public cloud IaaS, PaaS and SaaS

Point-in-time security and compliance assessments don't show the real picture

Manual compliance audits are time consuming and labor intensive

Misconfiguration of cloud workloads is the biggest security threat

A Survey of Security Professionals

Threat	Percentage
Misconfiguration of cloud workloads	62%
Unauthorized access	55%
Insecure interfaces/APIs	50%
Hijacking of accounts, services or traffic	47%
External sharing of data	39%
Foreign state sponsored cyberattacks	33%
Malicious insiders	30%
Malware/Ransomware	26%
Denial of services attacks	22%
Theft of service	12%
Lost mobile devices	7%
Other	7%

Cloud Security Posture Management (CSPM) is a must have

Gartner®

" Nearly all successful attacks on cloud services are the result of customer misconfiguration, mismanagement and mistakes. Security and risk management leaders should invest in cloud security posture management processes and tools to proactively and reactively identify and remediate these risks. "
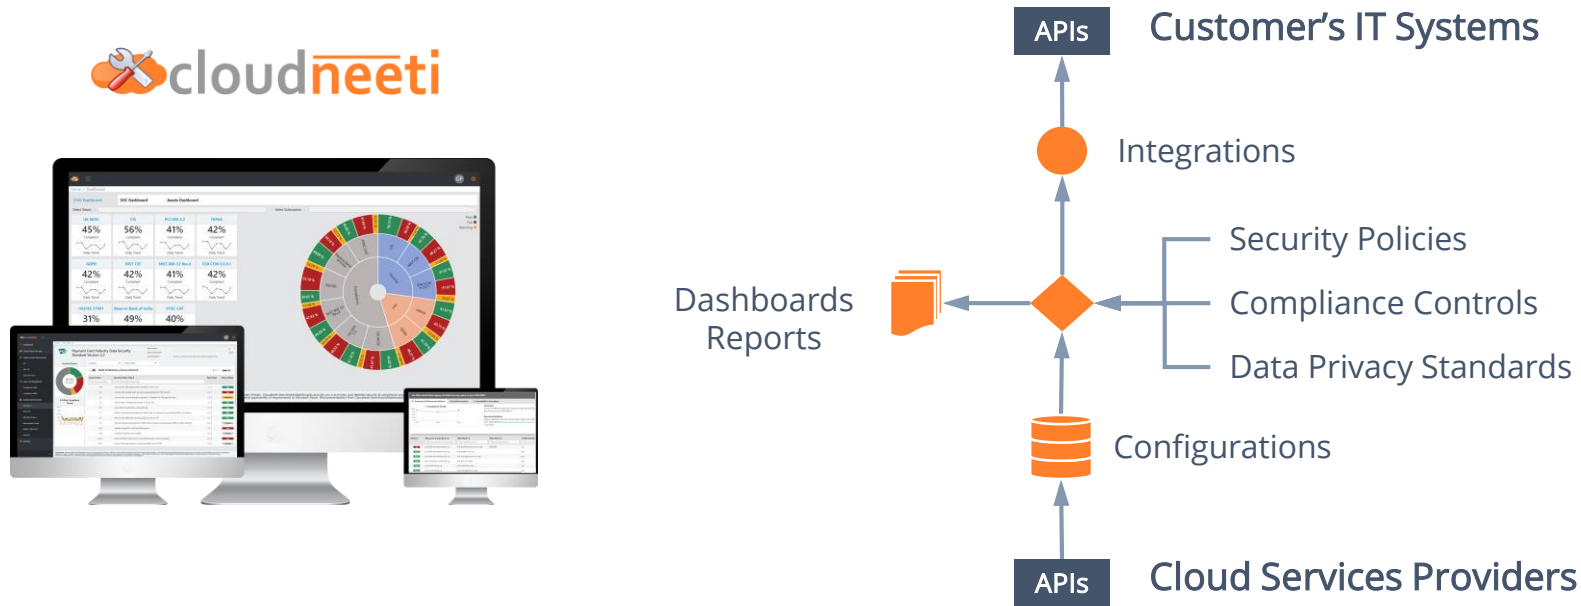

-Gartner, Innovation Insight for Cloud Security Posture Management, 25 January 2019

Gartner identified CSPM segment few years back

Hype Cycle for Cloud Security, 2018
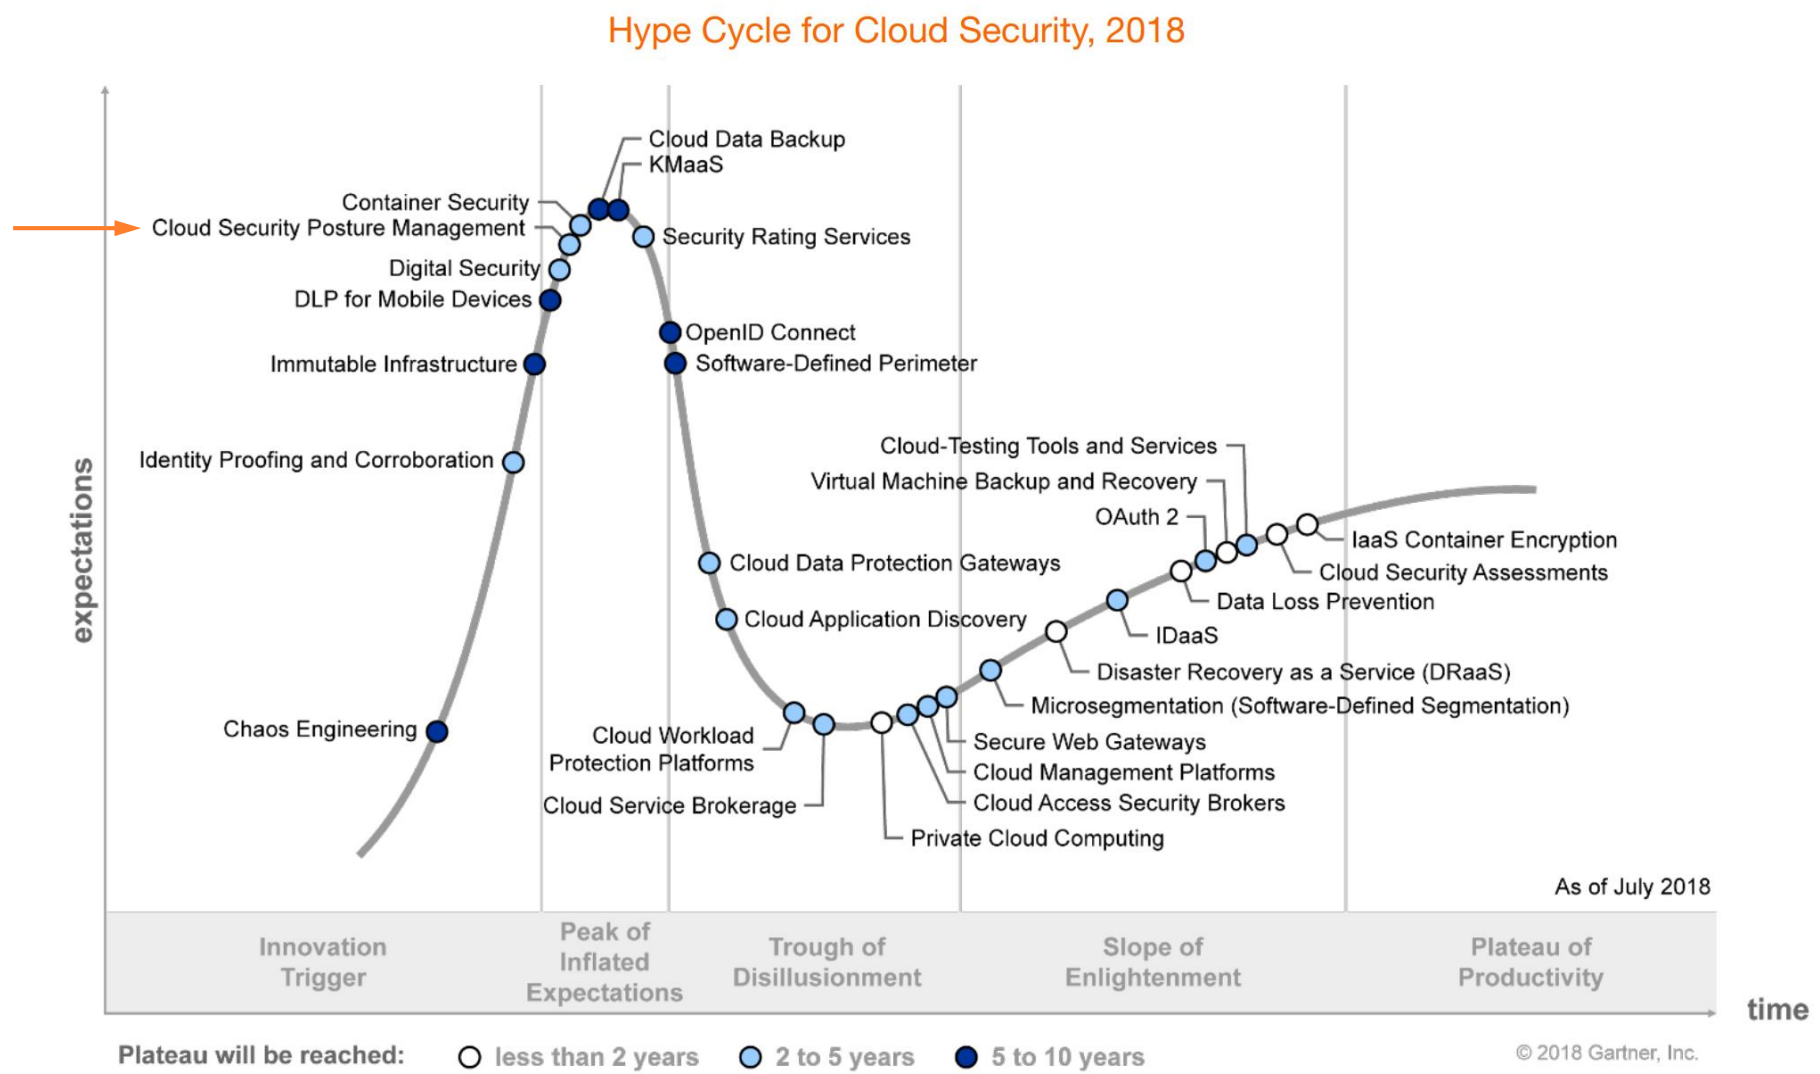

Cloudneeti offers advanced cloud security and compliance posture management for continuous assurance
