Office 365 Reports
that show you the full picture
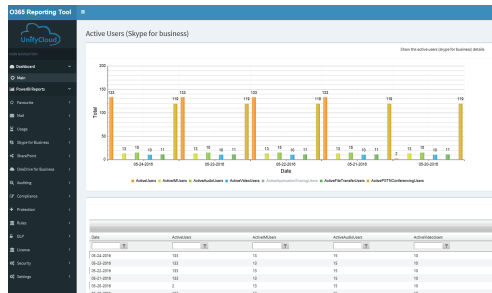

SharePoint

Exchange

OneDrive

Analytics, Reports, & Monitoring

- ◆ Detailed analytics for Office 365

- ◆ SharePoint, OneDrive, Skype, Active Directory, Exchange, Yammer

- ◆ Produce detailed technical recommendations
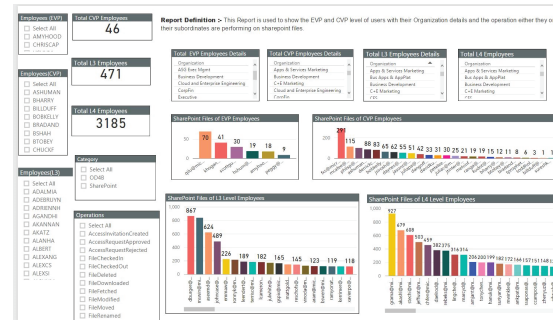

- ◆ Power BI integration

There is no value in data that cannot be interpreted in a meaningful way just as there is little value in data that you cannot understand.

Office Dashboard gives you comprehensive, visible data that is actionable and meaningful offering:

- ◆ Customized Reports & Dashboards

- ◆ Export, Share, and Own CSV & PDF's

- ◆ Empower your data analysis with PowerBI

Licensing & Usage

Inactive User and License reports show you all Office 365 Licenses that are either un-used or under-utilized. Potentially save thousands of dollars by tracking subscription utilization

- ◆ Identify areas that can be more efficiently assigned

- ◆ Tracked deployed vs. purchased licensees

- ◆ Identify areas of underutilization or under used

Security & Compliance

Gain insight into how people in your organization are using your Office 365 services. Identify security risks and cost savings while maintaining visibility of changes in your environment.

- ◆ Simply auditing & ensure policy compliance

- ◆ Identify security risks

- ◆ Deep insight into how the Office 365 services are being used

- ◆ Do your employees have access to SharePoint Libraries or mailboxes that they shouldn't?

- ◆ Do you know who has Office 365 Administrative rights in your environment?

Quickly understand who has access to what and where they are going and what they are doing. Our customized security, compliance, and audit reports will simplify the process.
