

CoreIMS is competitively priced, easy to use, full featured, and flexible

Addresses your warehouse needs cost effectively.

Manages single or multiple warehouses.

Easy to install, easy to use, and inexpensive to operate.

Delivers savings through improved inventory accuracy and increased labor productivity.

Integrates with popular accounting software systems.

Real-time inventory information to help you better manage your business and improve customer service.

Barcode/RFID scanning and printing.

Easily customizable.

CoreIMS delivers real-time visibility into inventory movements via two different methods: All functions can be executed via a local PC, including incorporation of bar code scanning via a RF scanner. Wireless scanning utilizes wireless (RF) mobile computers that send transactions directly to the database.

CoreIMS is designed for small to large size warehouses.

CoreIMS Benefits:

Simple to use: The user interface is well structured, simple and intuitive

Barcode scanning and printing

Runs on the latest technology: 100% Windows native application

LAN and Internet accessible

Low cost of training and support

Enhanced security: Detailed user permissions and full auditing of transactions

Database: Windows Server 2012/
Windows Server 2008 R2 SP1/ Windows Server 2008 SP2

(for Microsoft .NET Framework, version 4.6 compatibility)

Flexible built-in reporting designed with Crystal Reports. Using Crystal Reports, you can build your own custom reports

Integration with Sage 50 US/CAN, QuickBooks, UPS WorldShip, and Seagull Bartender. More integrations are under development.

An Inventory Management System that will meet your needs and budget

Addresses your warehouse needs cost effectively.

Manages single or multiple warehouses.

Easy to install, easy to use, and inexpensive to operate.

Delivers savings through improved inventory accuracy and increased labor productivity.

Integrates with popular accounting software systems.

Real-time inventory information to help you better manage your business and improve customer service.

Barcode/RFID scanning and printing.

Easily customizable.

Finally an affordable, feature-rich inventory and warehouse management system!

From small stockrooms to large warehouses, CoreIMS addresses all of your inventory and warehouse needs. CoreIMS works as a stand-alone system or can team up with your existing accounting software to improve inventory and order fulfillment accuracy.

CoreIMS supports multiple warehouses to provide the high level visibility needed to make decisions across your organization. Utilizing bar code scanning and printing adds another layer of control along with real time inventory tracking to CoreIMS.

CoreIMS is currently in use across a wide variety of industries. Contact us today to see how we meet the challenges of 3PL/Cold Storage, Contract Packaging, Asset Management, Marketing and Wholesale.

Functionality

Receiving: - controls receiving and put-away operations. Stock can be received against a purchase order or as an unexpected receipt.

Storing: - move stock between locations in the warehouse or between warehouses. Conduct cycle counting, physical inventory operations, and verify quantity of stock in locations.

Shipping – provides the ability to create sales orders, allocate available stock, ship it from the warehouse and print Packing Lists, Bills of Lading, and Shipping Labels.

Barcode Scanning and Label Printing: - receiving, put-away, movements, physical inventory, cycle counts, adjustments, picking and shipping can be performed using RF Barcode Scanning Devices. Barcodes can be generated and printed for items, pallets and locations.

Maintenance: - provides advanced, easy to use maintenance of the core objects of the IMS systems. Using a standard screen design, maintenance of warehouses, storage locations, items, units of measure, customer, owner and vendor is an intuitive process resulting in fast implementation and faster training.

Administration: - provides the ability to create and maintain system users. It also contains simple access configuration, which controls user permissions to access specific operations.

Reporting – contains a set of reports designed to facilitate warehouse management, general inquiry, and problem resolution.

Order Management - provides the ability to create and track Purchase Orders and Sales Orders in CoreIMS. Orders have a very flexible structure and fields could be changed to accommodate various customer requirements. Orders also could be imported from and to Sage/QB

Features List:

CoreIMS is a powerful, yet inexpensive inventory and warehouse management system. The table below lists the features and functionality supported by our software. Sign up for a free online demonstration today and judge for yourself just how easy it is to use our software!

CONCEPTS

- Multiple Warehouses
- User-Definable UOM
- Simple Access Control
- Personal User Profile
- Complete Transaction History

REPORTING

- Item Availability
- Receiving Order Status
- Shipping Order Status
- Back Order Status
- Serial Number History
- Date and User stamped

RECEIVING

- Against PO/Unexpected Receipt
- Receipt Documents
- Pallet/Container Labeling
- Primary Location
- Return Tracking

SHIPPING

- Partial Shipment
- Pending Shipment
- BOL and Packing List
- Back Orders
- Unship

ITEMS

- Item Groups & Classes
- Dimensions & Weight
- SKU & UPC Support
- Multiple Pricing
- Kitting
- Warranty
- Custom Definable Fields

STORING

- Cycle Count
- Physical Inventory
- Adjustments
- Movements
- Custom Hold Types

GENERAL

- Lot & Expiration Date
- FEFO/FIFO
- Serial Number Tracking
- Multi-SKU Pallets
- Pallets/Containers

REPLENISHMENT

- Inter Warehouse Transfers
- Min/Max Quantity Per Warehouse

ORDER MANAGEMENT

- Create and Track Orders
- Import and Export Orders

BARCODING

- RF Barcode Scanner Support
- Barcode Generation and Label Printing

INTEGRATION

- Intuit QuickBooks
- Sage 50 US Edition
- Microsoft Outlook
- Microsoft Excel
- Flat Files Import/Export
