# WHY

**Is localization important to any  
Indian business?**

Untapped

# MARKET POTENTIAL

## MILLION

Indian language internet users in 2021

75% of total internet user base

2nd biggest internet market after China

90% Indians can't understand English

70% users face challenges with text input and keyboards in English

Mere 0.1% content on internet is in Indian Languages

## DRIVING FORCES

Govt. wants to connect with all citizens to know about policies and how people can access them

Digital literacy in Indic languages to become a policy level decision

Indian language users face

# BROKEN INTERNET EXPERIENCE

**‘THERE IS AN APP FOR THAT’ holds  
TRUE for English internet users only**

Social media, news, email, mobile banking,  
online shopping, booking travel tickets, cabs,  
movie tickets or doctor’s appointment

Indian language internet users struggle to achieve simple tasks on the internet

- Digital properties are not compatible with Indian languages
- If they are localized, products and/or content is not searchable
- User face challenges with text input and keyboards in English

Can you ignore the 250 Mn strong non-English internet user base in India, 2017?

What is

# LOCALIZATION

- It is not mere translation of the content in multiple languages in a monologue
- Localization facilitates free flow of conversation and dialogue with consumers

# BENEFITS

Of localization

INCREASE  
REACH

BETTER USER  
EXPERIENCE

BUILD CONSUMER  
TRUST

IMPROVE  
BOTTOM LINE

# TESTIMONIALS

### ★ SHASHIN DEVSARE

**Executive Director, Karbonn Mobiles**

"We chose Reverie because space on a mobile phone comes at a premium and their solutions have the lightest footprint amongst similar language apps in the industry"

### ★ SUMIT KUMAR

**Supply Product Head, OLA**

Reverie is playing a pivotal role in our efforts to build a robust ecosystem for driver partners

### ★ VINAYAK DESAI

**Product manager, Practo Ray**

"Adoption of local-language SMS rose over 40% among our doctor base (5000+ doctors) in 3 months, with an adoption of over 60% in non T6 (non-metro) cities "
