ICONIC

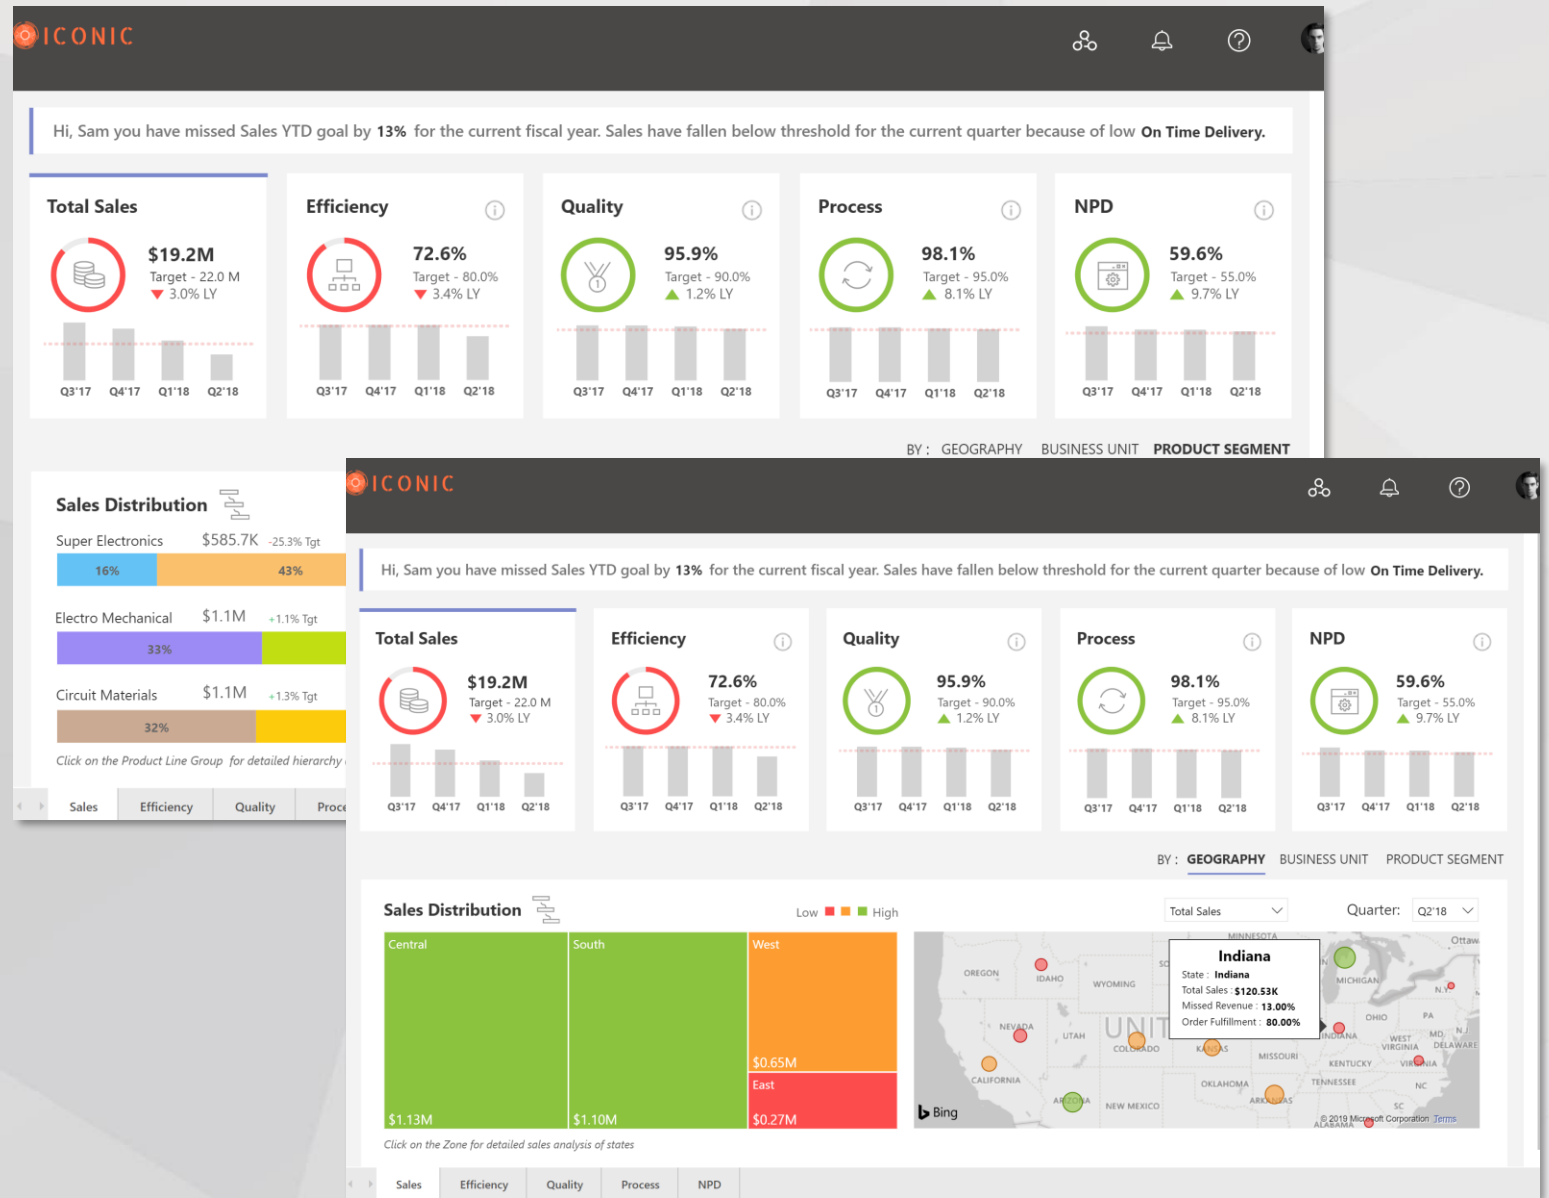

ANALYTICS FOR SMARTER MANUFACTURING

ICONIC

Analytics for Smarter Manufacturing

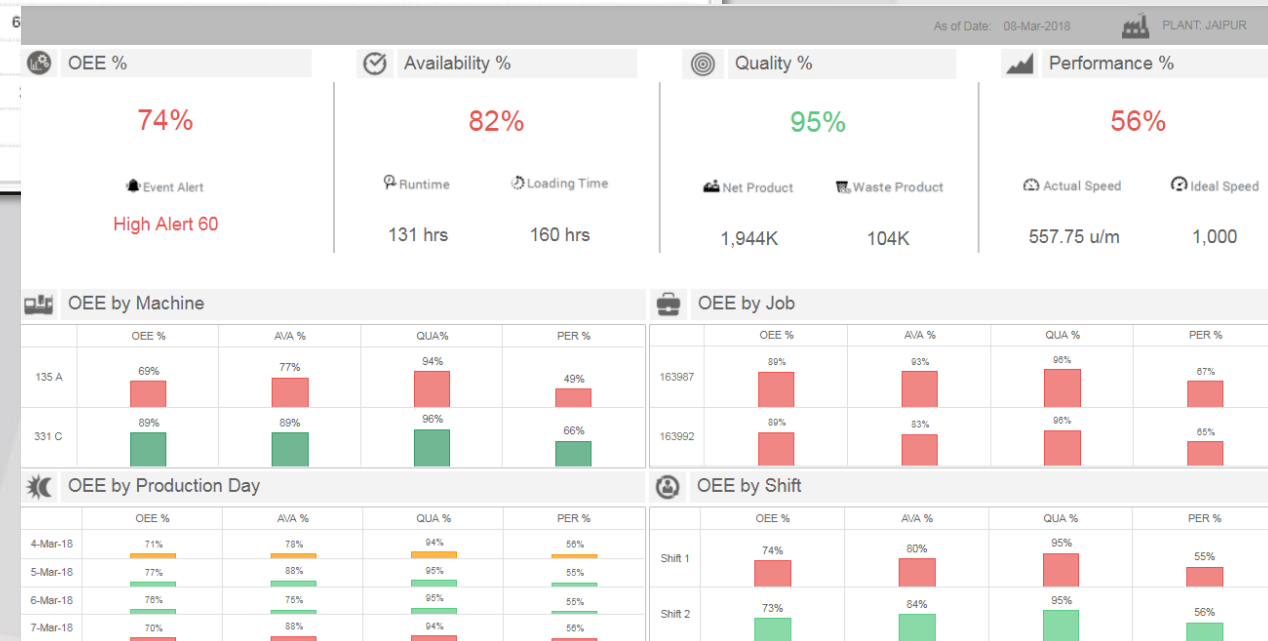

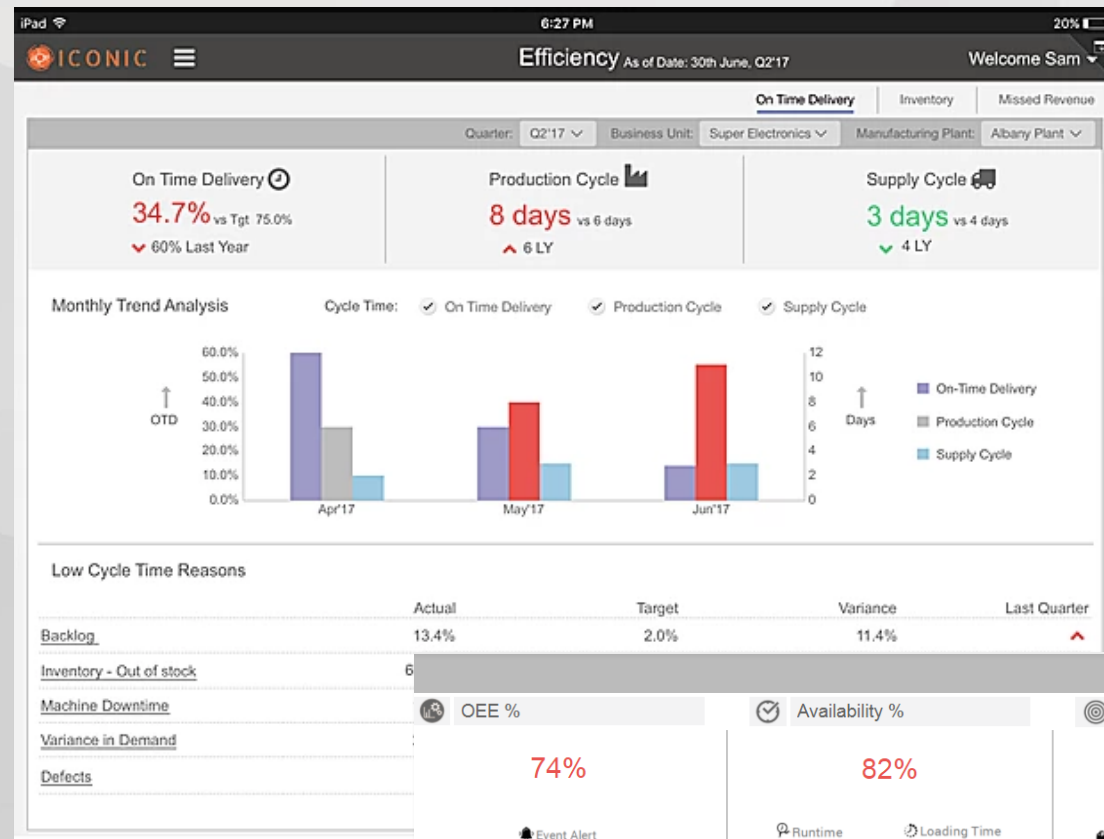

An analytics solution built for the manufacturing industry integrating key performing indicators across sales, operations, supply chain, quality, process, and product development.

Iconic is a prepackaged library of KPIs and interconnected dashboards with connectors to popular ERP, CRM, and BPM systems that integrates data across geography, currency, and product into a normalized data model optimized for analytics. Iconic provides balanced scorecards that provide insights across revenue, profitability, customer satisfaction, operational efficiency, quality control, and waste management.

ICONIC Key Features

- Manufacturing-optimized model supports balanced score-carding and advanced correlations.
- Library of industry standard KPIs and connectors to popular systems for plug-n-play.
- Interactive dashboards with smart visualizations for trend spotting and predictive insights.
- Native iPad app for faster performance and better user experience optimized for mobility.
