DISPL∧R

What is Displar?

Displar is an augmented reality platform that enables you to introduce products to your customers remotely.
You can publish your branded application to marketplaces such as Apple App Store or Google Play, manage content within built-in CMS and gather important data on customers' behaviour inside the viewer app.
Most importantly it's extremely affordable in comparison to app development process.

Product Video

Why to use it?

Customer engagement

Thanks to Displar your customers will not remain uncertain. They can engage with your products and get to know them better anywhere they want.

Insightful management

Thanks to our CMS, you can manage all the content within the app and publish all changes anytime you want. You also get access to a very insightful report on your customers' interactions with the app.
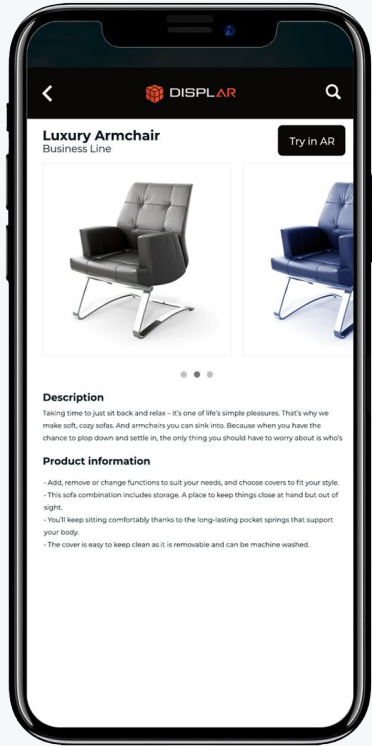

Time & Money

You don't have to reinvent the wheel again. Your branded Displar app will come even 10x faster and more affordable than application development process.

Comfort

You can concentrate on what is important to you, and we will take care of all the trouble. Thanks to our PaaS model, your app maintenance and further development is fully on our side.

DISPLAR

Have it your way

Displar is a fully customizable platform, that can be quickly adjusted to satisfy your needs. It's open to new features and external system integrations as well as specialized AR devices such as Microsoft Hololens. Just share your ideas and we will bring them to life.

How it works?

AR Application

Cloud API

Data Analysis

Displar Platform
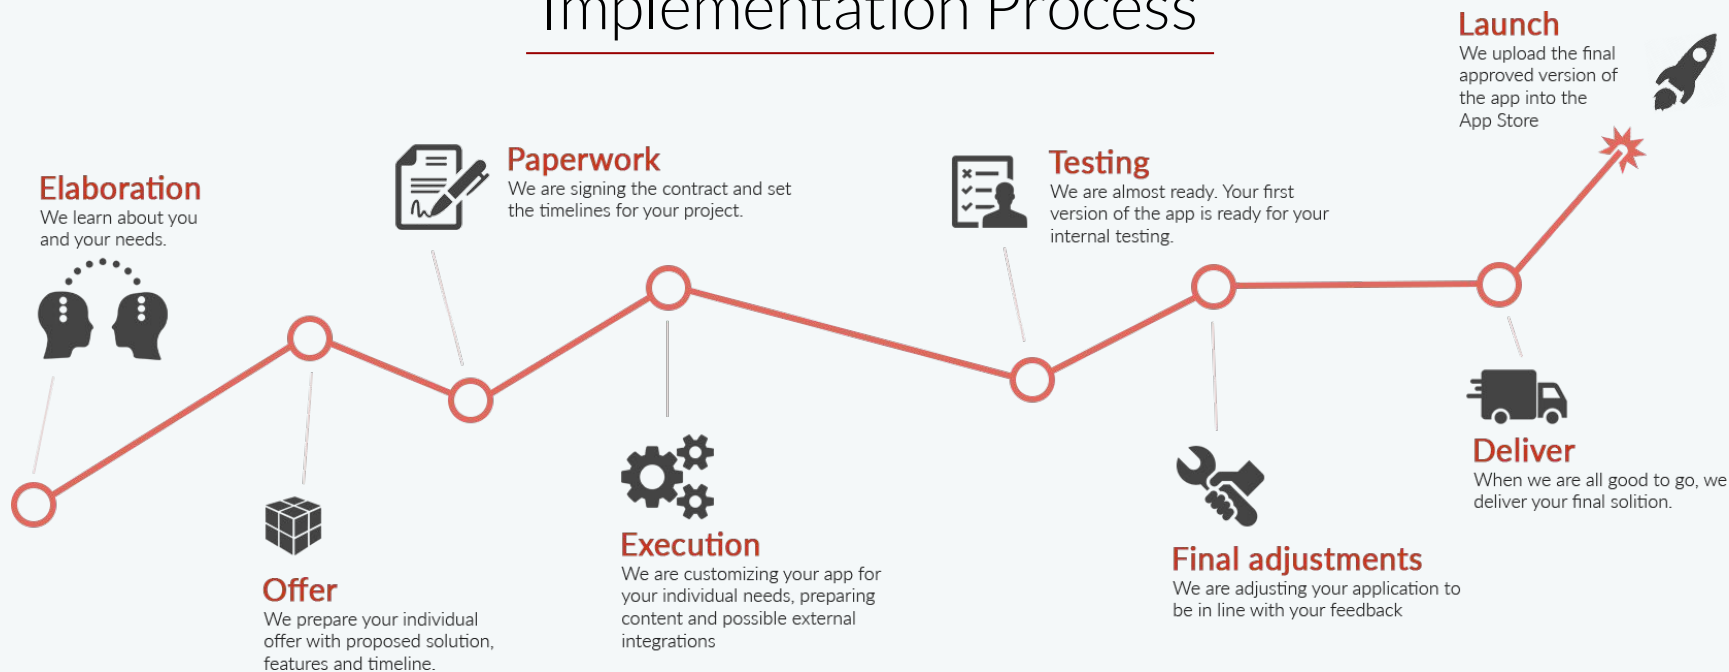

Thanks to our Platform:

1. **We are** building your branded and customized AR application.

2. **We are** giving you the access to the platform, where you can manage content and read the application usage reports.

3. **We are** taking care of the app maintenance and provide you with all required support.

Implementation Process

Launch
We upload the final approved version of the app into the App Store

Elaboration
We learn about you and your needs.

Paperwork
We are signing the contract and set the timelines for your project.

Testing
We are almost ready. Your first version of the app is ready for your internal testing.

Offer
We prepare your individual offer with proposed solution, features and timeline.

Execution
We are customizing your app for your individual needs, preparing content and possible external integrations

Final adjustments
We are adjusting your application to be in line with your feedback

Deliver
When we are all good to go, we deliver your final solition.
