

cloudmigrator

The downloadable version of CloudMigrator, ideal for large and complex migrations.

Over
7,000,000
users migrated with CloudMigrator

Ideal for larger, more complex migrations, simply download and setup CloudMigrator in your own environment and use either our desktop or browser based interface to complete your migration.

Easy

Using either our desktop or web interface, CloudMigrator easily completes even the most complex of migrations.

Fast

With a highly configurable setup, spin up a multitude of virtual machines to complete your migration in no time.

Secure

With over 7 million people already securely migrated to the cloud, data integrity is guaranteed and there's zero downtime to users.

5.9 petabytes
migrated with CloudMigrator

81 countries
using CloudMigrator

83 billion items
migrated and managed

Whether completing a migration for your customers or handling your own migration, CloudMigrator is highly configurable, allowing you to complete the most complex and demanding migrations with ease.

Once set up in your environment, CloudMigrator can securely migrate your files, email, contacts, calendars and tasks to your chosen destination, be it G Suite or Office 365.
