Smart Billing Manager

- **Real Time AI**
- **Decision support**
- **Billing intelligence**

Delivering a System of Intelligence for Personalized Surgical Care

What is Smart Billing Manager?

Smart Billing Manager is a set of intelligent tools to improve revenue capture and compliance through real-time decision support at the point of care and AI driven billing reports. Real-time decision support enables complete and accurate capture of data for billing with fewer amendments to medical records. AI driven billing reports facilitate faster charge submission, more accurate procedure codes and efficient billing process.

Perioperative data platform → Real-time decision support → AI driven billing report

Why customers use Smart Billing Manager?

- Better revenue capture
- Better compliance
- Fewer amendments
- Faster billing
- Optimal coding
- Efficient billing process

Better revenue capture and compliance

- Real-time decision support
- Missed billing items reminders
- Incorrect documentation alerts
- Notifications to ensure compliant documentation
- Notifications to ensure timely finalization of records
- Captures quality data for MACRA/MIPS

Accurate & fast billing

- AI algorithms to determine optimal procedure codes
- Complete capture of billable items
- Clear consolidation of billing data elements
- Automated concurrency checks
- Assistive intelligence to improve billing accuracy
- Data automation to improve billing efficiency

Smart Billing Manager enables accurate and compliant billing

" ..... Smart Billing Manager is a proven system to enable accurate and compliant billing. Complete billing capture and compliant documentation is ensured through real-time decision support while automation and AI driven coding ensures faster, optimal and efficient billing for anesthesia services ....."
