

PST Flight Deck for PST Migrations to Office 365

Find, migrate, and eradicate PST files wherever they lurk in your environment

PST files are a massive headache. They are prone to corruption, they proliferate unchecked throughout your environment, and they put you at serious risk of data leakage.

Introducing PST Flight Deck

PST Flight Deck finds, migrates, and then eradicates PST files with zero impact on end users and IT services while also meeting stringent requirements for data ownership and security.

Take intelligent action against your PST estate

- Find them everywhere, view reports on size and location—there are ALWAYS more than you suspect!
- Apply filters, verify ownership, repair corruption

Know what you have – where it is and who owns it – before you migrate

Trusted by large enterprises all over the world

- PST Flight Deck is being used today in virtually every large enterprise-scale PST migration project on the planet

Globally scalable, centrally managed

Peace of mind. Happy users. Reduced risk.

- Eliminate a major source of potential data leakage
- Bring ALL your data home to Office 365 to maximize your employees' productivity
- Improve your security posture and your ability to meet discovery and compliance requirements by bringing ALL your data under management by Office 365's advanced discovery and data governance capabilities

Bring ALL your data home to Microsoft Office 365

- No enterprise can be fully productive nor truly secure until ALL your data resides in Office 365 where users can access it easily and stakeholders have it under centralized control

Unlock the full power of Microsoft 365's advanced capabilities

"We used PST Flight Deck to find and migrate PSTs for 32,000 users across seven countries and saved (by our estimates) EUR 500,000 versus the cost of a manual migration."
