

# Stakeholder Management Dashboard for MS Project Online

## BUSINESS FRIENDLY PROJECT KPIs

Translate Project Control KPIs for business friendly consumption. Easily interpret project performance and confidently present to other stakeholders

## INTEGRATED PROJECT SCORECARD

Correlate multiple project perspectives to gain quick insights and chart effective intervention strategies.

## GPS TAGGED SITE FEEDS

Capture and upload offline Photos, Videos and Drone Feeds from Site. View site progress over project timeline

## GESTURE DRIVEN INTERACTIONS

Touch, Tap, Pinch, Drag – Use the gestures you are already familiar with from your mobile devices to access project details. Easy and intuitive, making it ideal for present on Touch Screen TVs to Mobile devices.

Designed by CEOs to present project progress updates to Executive and Senior Management Stakeholders, Executive Eye demystifies complex project performance reports into easy to understand visual and business friendly metrics.

Developed for rapid absorption and mental project progress visualization, Executive Eye complements and augments progress reporting from MS Project Online. Rich content feeds from project site, supplemented with additional project perspectives and historical trends give stakeholders a deeper understanding of present performance to gauge future performance with increased reliability.

- **Geospatial Project Performance Reporting.** Add geo-spatial context to project progress reporting
- **Integrate with MS Project Online.** Link to MS Project for Project details and avoid duplicate data entries
- **Validate MS Project Progress with Site Feed Content.** Validate Progress on Site against MS Project Progress Reports
- **Non-Linear Presentation Canvas**  
Correlate perspectives from various sources using a single canvas and drive strategic decisions and action plans

With increased pressure on Executive Stakeholders to be accountable for their projects, the demand for easy to understand dashboards and reports that empower them to perform strategic and timely interventions is gaining rapid momentum.

Executive Eye's cloud based, mobile Interactions coupled with Infographic style reporting has opened a new channel for non-technical Executives to fully understand the performance of their projects and participate effectively in steering their projects to completion within planned budget and duration.
