

**VEHICLE TRACKING THAT DELIVERS UNMATCHED CONTROL...
UNLIMITED FREEDOM**

Fleet management is riddled with unknowns. Fuel costs, traffic patterns, fluctuating demand, out-of-the-blue mechanical issues, the heavy reliance on driver judgement — they're just a few of the challenges that can impede efficiency and squeeze your operating margin. Robust real-time vehicle tracking provides a clear picture of performance on all of these measures and more. But the true value of this data comes from linking to enterprise systems that yield meaningful business insight.

With Vehicle & Fleet Tracking Solutions from **ROAMWORKS**, you can bridge the system gap between remote data collection and the back-end applications that manage your business. Our web-based solution is network and hardware-agnostic, giving you the freedom to integrate, transmit, receive, distribute, analyze, manage and display data from remote assets in whatever manner you choose.

**THE ROAMWORKS™
ADVANTAGE**

- **Unparalleled ability to integrate** with variable networks and remote devices allows for optimal functionality and cost management.
- **Seamless integration** with financial, ERP and other third-party business applications turns vehicle tracking data into meaningful insight.
- **In-market applications** are ready for deployment in days, not weeks.
- **Hundreds of variable reporting features and tools** for multi-level users and management teams.
- **FREE software upgrades monthly** Customers have access to universal platform changes regularly for improved application performance.
- **Wholesale partnerships** with major hardware and connectivity providers around the world.
- **Hosting, Development and Business Consulting Services.**
- **Solid customer base** with referrals available upon request.

REAL-TIME VEHICLE MONITORING = BETTER DECISIONS

Are your drivers experiencing heavy delays due to traffic, road construction or weather? Are they exceeding speed limits and wasting fuel? Is it time for routine maintenance? Get easy-to-read information onscreen, and pull configurable reports that can be emailed or sent via text.

ROAM™ VEHICLE & FLEET TRACKING FEATURES

Determine location, direction and route detail of assets via a single map view; Animation capabilities show route detail on a specific asset over time

Select a date range and start monitoring historical data around driver behavior, trip reports and custom events

FIND YOUR IDEAL TRACKING SOLUTION TODAY!

ABOUT ROAMWORKS

Founded in 2000, **ROAMWORKS** sets a new standard in mobile and fixed asset tracking and monitoring. Drawing on decades of wireless experience — with particular emphasis in communications and messaging, software design for multi-level user interaction, distribution and logistics, facilities management, financial services, and data security — our engineers and executives have delivered revolutionary market applications now used in over 30 industries across the globe.

With corporate offices in Dubai (UAE), Atlanta (USA), Bonn (Germany), and Riyadh (KSA), **ROAMWORKS** is constantly evolving to quickly fulfill niche market demands and improve business performance for customers worldwide. Call today or visit roamworks.com to learn more.

ROAM VEHICLE & FLEET TRACKING SOFTWARE APPLICATION FEATURES INCLUDE:

- **Cloud-based software** accessible via any standard Web browser (Internet Explorer, Chrome, Firefox, Safari and Opera). No software installation or setup required.
- **Accessible** via PC, Mac, smart phones, tablets and PDAs.
- **Secure** multi-level login and filters with Username and Password.
- **Web Services Integration.**
- **Geofencing** with entry/exit notifications.
- **Different location categories** to cover various points of interest.
- **Auto-scheduled reports** to different users' distribution lists.
- **Integrates** with various map servers.
- **Multi-language user interface** includes English, French, Spanish, German, Mandarin, Arabic and Portuguese.
- **Client logo and branding** options available.
- **Reports output** into HTML, Excel, PDF, Word, CSV and KML file formats.
- **Online access** to a minimum of 60 days of historical data.
- **Alerts can be forwarded** as email, SMS and pop-up windows for active application users.

BENEFITS TO YOUR ORGANIZATION

- **Better understanding.** Our enterprise business applications show you how vehicle performance affects fuel consumption, driver behavior, fee structures and more with countless reporting capabilities that make it easy for customers to access and understand.
- **Safer operations.** In addition to understanding driver behavior so you can maintain a safe fleet, we can implement additional features such as a panic button, door contact sensor and vehicle immobilizer to help protect your driver and their cargo from criminal activity.
- **Improved customer service.** Increase productivity by providing realistic scheduling, accurate status updates and better dispatch capabilities.
- **Tighter control.** For example, assign "virtual fences" and zone notifications that indicate vehicle movements such as arriving and departing a customer location, idling, or venturing beyond an assigned zone.
- **Faster response.** The minute something unexpected happens — i.e., a flat tire, an accident, driver illness or other emergency — you'll know immediately and can quickly react.
