

SILVERBRIDGE

## Enhancing business agility and increasing operational performance

### About Exergy

Exergy, SilverBridge's flagship product, has been running for over 20 years and the operation extends to 37 implementations, across 13 African countries.

Enabling insurers to effectively create, deliver, administer and manage a full range of financial solutions, both as individual policies or as group schemes.

Exergy has preconfigured products and processes enabling clients to be operational quickly.

The solution can be installed immediately allowing clients to familiarise themselves with the system before optimising it for specific needs. This greatly reduces the time it takes to become operational.

### With Exergy:

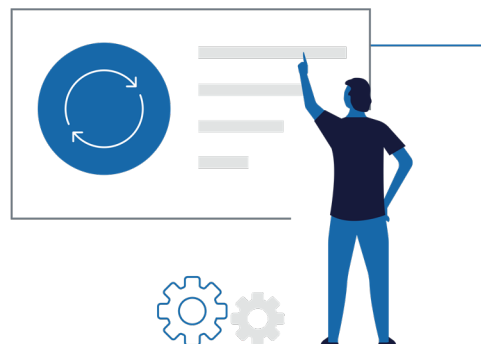

- you get end-to-end administration of your business process throughout the insurance life cycle.
- you can grow your business to millions of policies using one single platform.
- we enable our clients to take advantage of our extensive experience through our pre-configured base (Products and processes).
- we can build customised ad-on applications around the system to meet your specific needs.
- you can test your new products in the market without incurring large IT costs.
- you can operate in multiple currencies, or countries, with multiple languages.
- you have access to support from a team with over 20 years of industry experience.

### What our clients say

*"We have been a SilverBridge client since December 2007, it's not that they are just providing us with software, they are preparing us for the future as well."*
