

Knowledge sharing and collaboration. Creating, Assigning, Sharing and Submitting assignments. K-12 and youth educations.
Microsoft Office 365 & Microsoft Azure.

SchoolBoard

Market Drivers

- The vision of a **completely digital classroom** producing world class learners who are prepared to meet future global challenges.
- **1:1 computing** trend growing in schools.
- Educators are looking at ways to **transform their classrooms** into paperless spaces of learning.

Introduction

- User-friendly and intuitive user interface – cross platform and responsive.
- Supports schools, teachers and students working digitally with simple workflows.
- Creating, Assigning, Sharing and Submitting assignments at a click of the mouse.
- Drives knowledge sharing and collaboration through access to the latest Microsoft productivity tools.

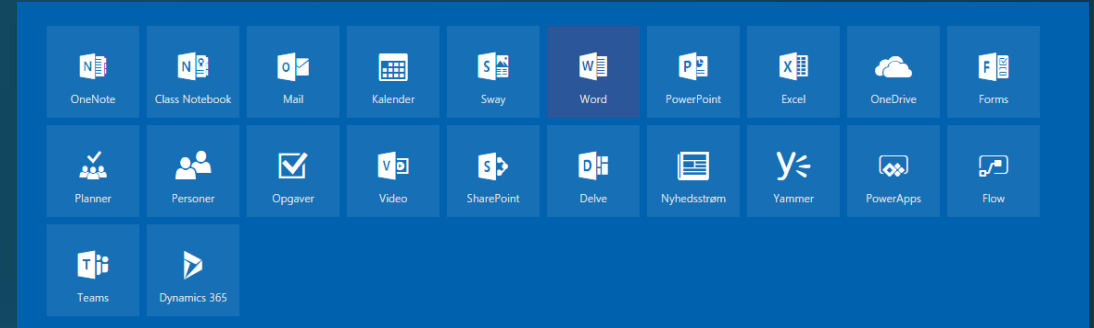

- Developed and runs on Microsoft Office 365 / Azure.
- Sync's user profiles and class rosters from Student Information Systems.
- Provision groups and class websites, and allows learning apps to securely access student data.
- Provides a framework and the school structure which is not immediately supplied with Microsoft Office 365.

- No software installs and no updates.
- Delivered as a service – hosted in Microsoft Datacenters.
- Leveraging Microsoft innovation and educational sector focus – enabled by a pay per user business model.
- Catered especially for K-12 and youth educations.
- Feet on the street; Foreign markets through local partnerships.

Schoolboard makes Office 365 easy

- Developed entirely on Microsoft Office 365.
- Leverages Microsoft Azure for user automation and administration.
- Sync's user profiles and class rosters from Student Information Systems.
- Provision groups and class websites, and allows learning apps to securely access student data.

Where are my classes and my students? I miss my School structure

Features

- Supports schools, teachers and students working digitally with simple workflows.
- Teachers and students enjoy a single sign-on experience for their learning apps and helps organize learning resources.
- Provides a framework and the school structure which is not immediately supplied with Microsoft Office365.
- Drives knowledge sharing and collaboration through access to the latest Microsoft productivity tools.
- Simple and easy accessible user interface.
- Microsoft Office documents on smart phones, tablets and PC's.
- Copying, sharing and submitting assignments at a click of the mouse.
- Support process oriented writing with several authors writing in one and same Word document, Excel spreadsheet or PowerPoint presentation at the same time.
- Sorting by headlines provides an easy overview.
- Students submit directly to the teachers' submission folder without the use of e-mail, USB or Dropbox.
- Learning progress and homework easily saved in the class' common assignment folder.
- Individual link collection for the school, the class, the team and for teachers as well.
- Learning progress and teaching resources are shared and distributed directly among teachers.

Case story: Municipality of Kolding

- Background;

- Kolding is a municipality in Denmark on the east coast of the Jutland peninsula in southeast Denmark. The municipality covers an area of 640 km², and has a total population of 91,695 (2016). The main city and the site of its municipal council is the seaport city of Kolding, the sixth largest city in Denmark.
- As part of Vision 2022, "We design life", Education is one of four strategic pillars, Kolding has chosen to strengthen its efforts towards education providing better opportunities for students and teachers to work – digitally – together.

- Key facts;

- Implemented 2014
- 23 schools
- 12,000+ students/teachers
- Media patrols (train-the-trainer) and high visibility/focus

- Camilla Johansen, Director, Kolding Educational Center:

- "We are very happy to work with Skolebordet.dk to educate media patrols among students in public schools and to implement their solution in the municipality. Skolebordet.dk will become the central place to work with school papers and assignments from the teacher. One clear benefit is, that students can access the solution from anywhere and from any device. Implementing this solution helps us satisfy important needs from our most important citizens – our children and students."

- Julich Wiberg, Academic Lead, Microsoft Denmark:

- "Focusing on bringing students' in front of other students to teach is a great initiative and will strengthen all students regardless of their professional or social background. It will be fun to contribute actively to the project and not only provide the technology. I'm sure it will be a lighthouse project for others to follow."
