

# The StoreLynk Platform

StoreLynk is a cloud-based smart store platform that collects, analyzes and alerts on sensor and equipment data throughout your store to **improve food safety, streamline operations and optimize the customer experience**. StoreLynk enables you to start with plug and play sensors, while providing a scalable foundation for a fully integrated network of smart stores.

# A Comprehensive Platform to Improve...

## Food Safety

Protect against consumer health risks

## Food & Product Quality

Standardize & optimize food quality across locations

## Proactive Maintenance

Prevent costly equipment issues or failures

## Process Efficiency

Automate processes & issue resolution

## Energy Savings

Maintain ideal operating ranges for cost savings

## Internal & External Compliance

Produce instant & comprehensive temperature logs
