

PROJECT MANAGEMENT SYSTEM

Enovatio Projects

- Efficient project management
- Creating project plans
- Increasing the effectiveness of cooperation
- Control and management of resources and employees
- Generating reports

Manage your projects efficiently and on a high level

Enovatio Projects is a complete solution,

that enables the creation of timetables, completion of projects on time, within budget and according to specification. The system increases the efficiency of project management and provides systematization thereof. This solution is available through a web browser in multiple languages.

Effective project management through a variety of functions and monitoring the progress of the Business

Control and management of resources and employees involved in the project

Creating project plans using a variety of tools, e.g. Gantt charts

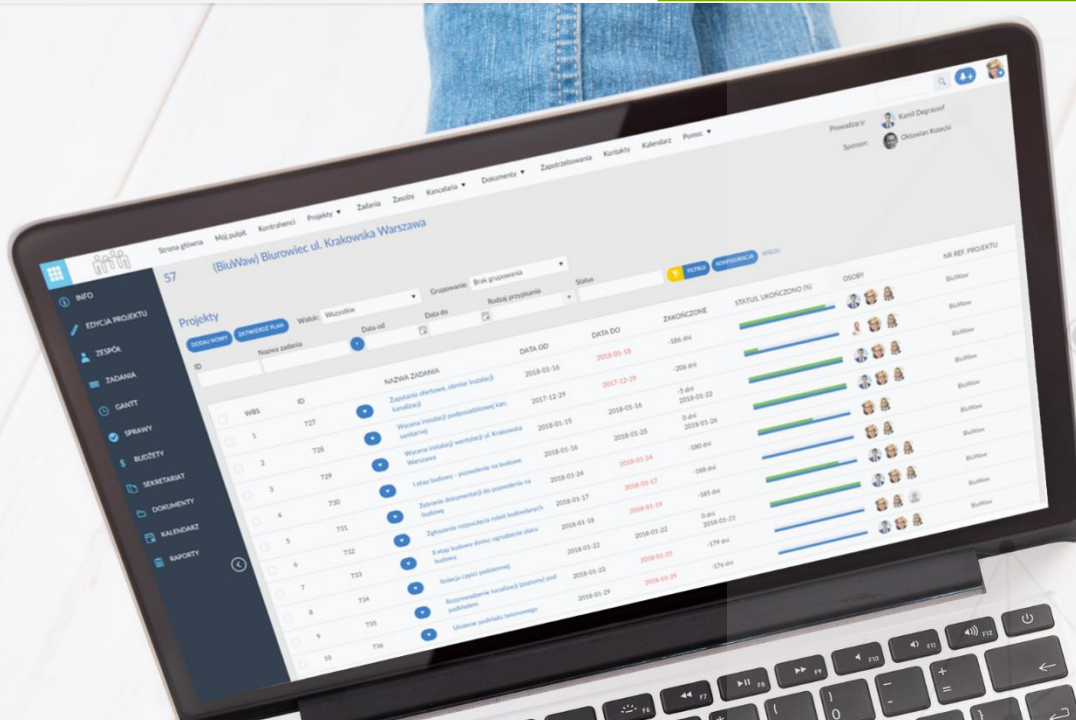

Centralized database of documents/information and central workplace

Increasing effectiveness of the cooperation of the project team

Generating reports and supporting the creation of statements

Enovatio Projects that also:

- Project templates
- Gantt charts
- Resource management
- Task sharing
- Adding documents to a project
- Alerts and personalised email notifications
- Corporate/personal calendar
- Contacts library
- User's central workplace
- Advanced user authorisation
- Microsoft Exchange integration

The system contains all the information about a given project, to which a specific metric is assigned. The portfolio of projects includes the entire list and "dashboard" that shows all the key information and visualizes the progress of the works.

The functionality of the system allows the creation of an unlimited number of tasks, editing them, and it enables the assignment of roles to each employee (leader, supervisor, performer, participant in the task). Creating a hierarchy of tasks (WBS) and prioritization helps to systematize the work in a project team. Filters are handy when there is a large amount of information and you wish to locate it. When a task is overdue, it displays an alert in the task list.

The project templates function provides automation of work while setting up new ventures. It allows easy reproduction of the set model task/project, along with the data

The "Dashboard" provides access to key information and allows monitoring of critical components for all projects. The percentage rates of completion, modification history, and personalized e-mails remind about deadlines.

The Gantt charts located in the system allow: transparency in work progress; avoidance of tasks overlapping each other and overloading; analyses of changes in the undertaken project; determination of the critical path in order to complete the project in time; assigning a person to carry out a given task; these functions allow efficient projects management.

Enovatio Projects allows you to define custom rules for e-mail notifications for the selected project teams or individuals. Notifications can be configured for various system events, such as editing, adding details, assigning the task to the proper employee, etc. In addition, in the case of an overdue task, the system displays alerts on the task list.

RESOURCE MANAGEMENT

The functionality of the system ensures efficient control and management of resources. This makes it possible to analyze in what time frame the user, team, or material resources are used

MY DESKTOP

The central place for work in the system for each employee is "My Desktop". This place displays: all tasks with specific dates of execution and the status of their implementation; things to attend to with a specified type and a "deadline"; meetings scheduled for a given day; in separate tabs: documents, reports, calendar, and portfolio of projects relating to a given employee.

CENTRALIZED DATABASE

Project management system Enovatio Projects is a knowledge and documents database and place for archiving all completed actions.. The Enovatio Projects System allows you to store all the necessary text documents and image files and assign them both to projects and to tasks. An indispensable tool is also the index of the contact details of persons involved or associated with the project.

GRANTING RIGHTS

The system allows you to give certain rights to persons working on the project (read only, editable, administrator). They may be default, as well as customized to particular user or project.

CALENDAR

An essential tool when working with projects is the expanded calendar, where you can note a meeting and share it with other users from the project team. This tool allows you to plan and verify the intensity of the meetings and to track the availability of team members. Thanks to the graphics used, the user has more clarity at the planning stage.

RECORDING OF WORKING TIME

It is a function showing the actual number of hours spent by a project participant on a specific task. This allows you to control and manage your time more efficiently in subsequently implemented works.

REPORTS

The system can generate reports needed for all kinds of statements for the purposes of the company, as well as the Clients. The generated report may contain all the data entered while conducting projects.

INTEGRATION, SAFETY

The flexibility of the system allows the ability to export to Microsoft Project. The system provides high-quality security of databases and blocks public access to them.

INSTALLATION

Enovatio Projects can be installed and run:

- In a cloud, on the Windows Azure platform
- On the Client's server

HARDWARE REQUIREMENTS AND LICENSE REQUIREMENTS TO RUN THE SYSTEM

Application server

Windows 2008/2012/2016/Azure Server + IIS + .NET Framework 4.6
Hardware requirements in accordance with the recommended requirements of the operating system

Database server

SQL Server 2008/2012/2014/2016/ Azure + Reporting Services (also the Express Edition version – free)
Hardware requirements in accordance with the recommended requirements of the operating system and the database server

Client's computer, tablet

A computer equipped with a new web browser: IE, Firefox, Chrome or Safari. Screen resolution of at least 1280x720px
