SCHEDULE SQL TASKS IN AZURE

RoverGo brings back SQL Server Agent scheduling to Azure SQL DB

Easily manage your SQL tasks

The RoverGo portal is secure, responsive, and intuitive. You can set up new tasks in minutes, manage current tasks, and view your task history all in a few clicks (or taps).

- → Task summary dashboard
- → Create new tasks
- → Manage current tasks
- → View task history

- → Set up email alerts
- → Enable/disable tasks
- → Manage task recurrence
- → Manage your plan
