WHAT IS ISP?

ISP is a platform that enables companies to automate the process of tracking, verifying and approving supplier invoices prior to processing payment.

THE CLIENT'S STORY

Customers receive a large number of invoices every month and from different channels such as suppliers, vendors, contractors, and even company employees.

Keeping track of all these invoices and ensuring they are approved and processed on time is challenging and very time consuming. They often face challenges with cashflow accuracy due to no visibility on what is due, and when.

ISP can control how invoices are delivered from suppliers, automate the approval process, and control communication with suppliers would completely transform how companies handle their operations and processes.

PERSONAS

1

Account payable

2

Procurement team

3

Finance managers

TRY ISP

- Have a process for one invoice type
- Register for Trial version
- Create Supplier Form
- Invite Supplier
- Automate the process

The image shows a modern office environment with large windows in the background. Several people are visible, mostly in silhouette, working at desks or standing. A large, semi-transparent red rectangle is overlaid on the center of the image. Inside this rectangle, the words "THANK YOU" are written in a bold, white, sans-serif font. The overall aesthetic is professional and contemporary.

THANK YOU
