# DIGITAL OFFSHORE: A BIG DATA DELUGE

"Forrester Research estimates that **between 60% and 73%** of data that enterprises have access to **goes unused** for business intelligence and analytics"

# SUBSEA DIGITAL TWIN

Smart Visual Representation of Real Assets

## Reduce Costs

- Accelerate decision making across all phases.
- API based architecture creates digital dialogs

## Reduce Risk

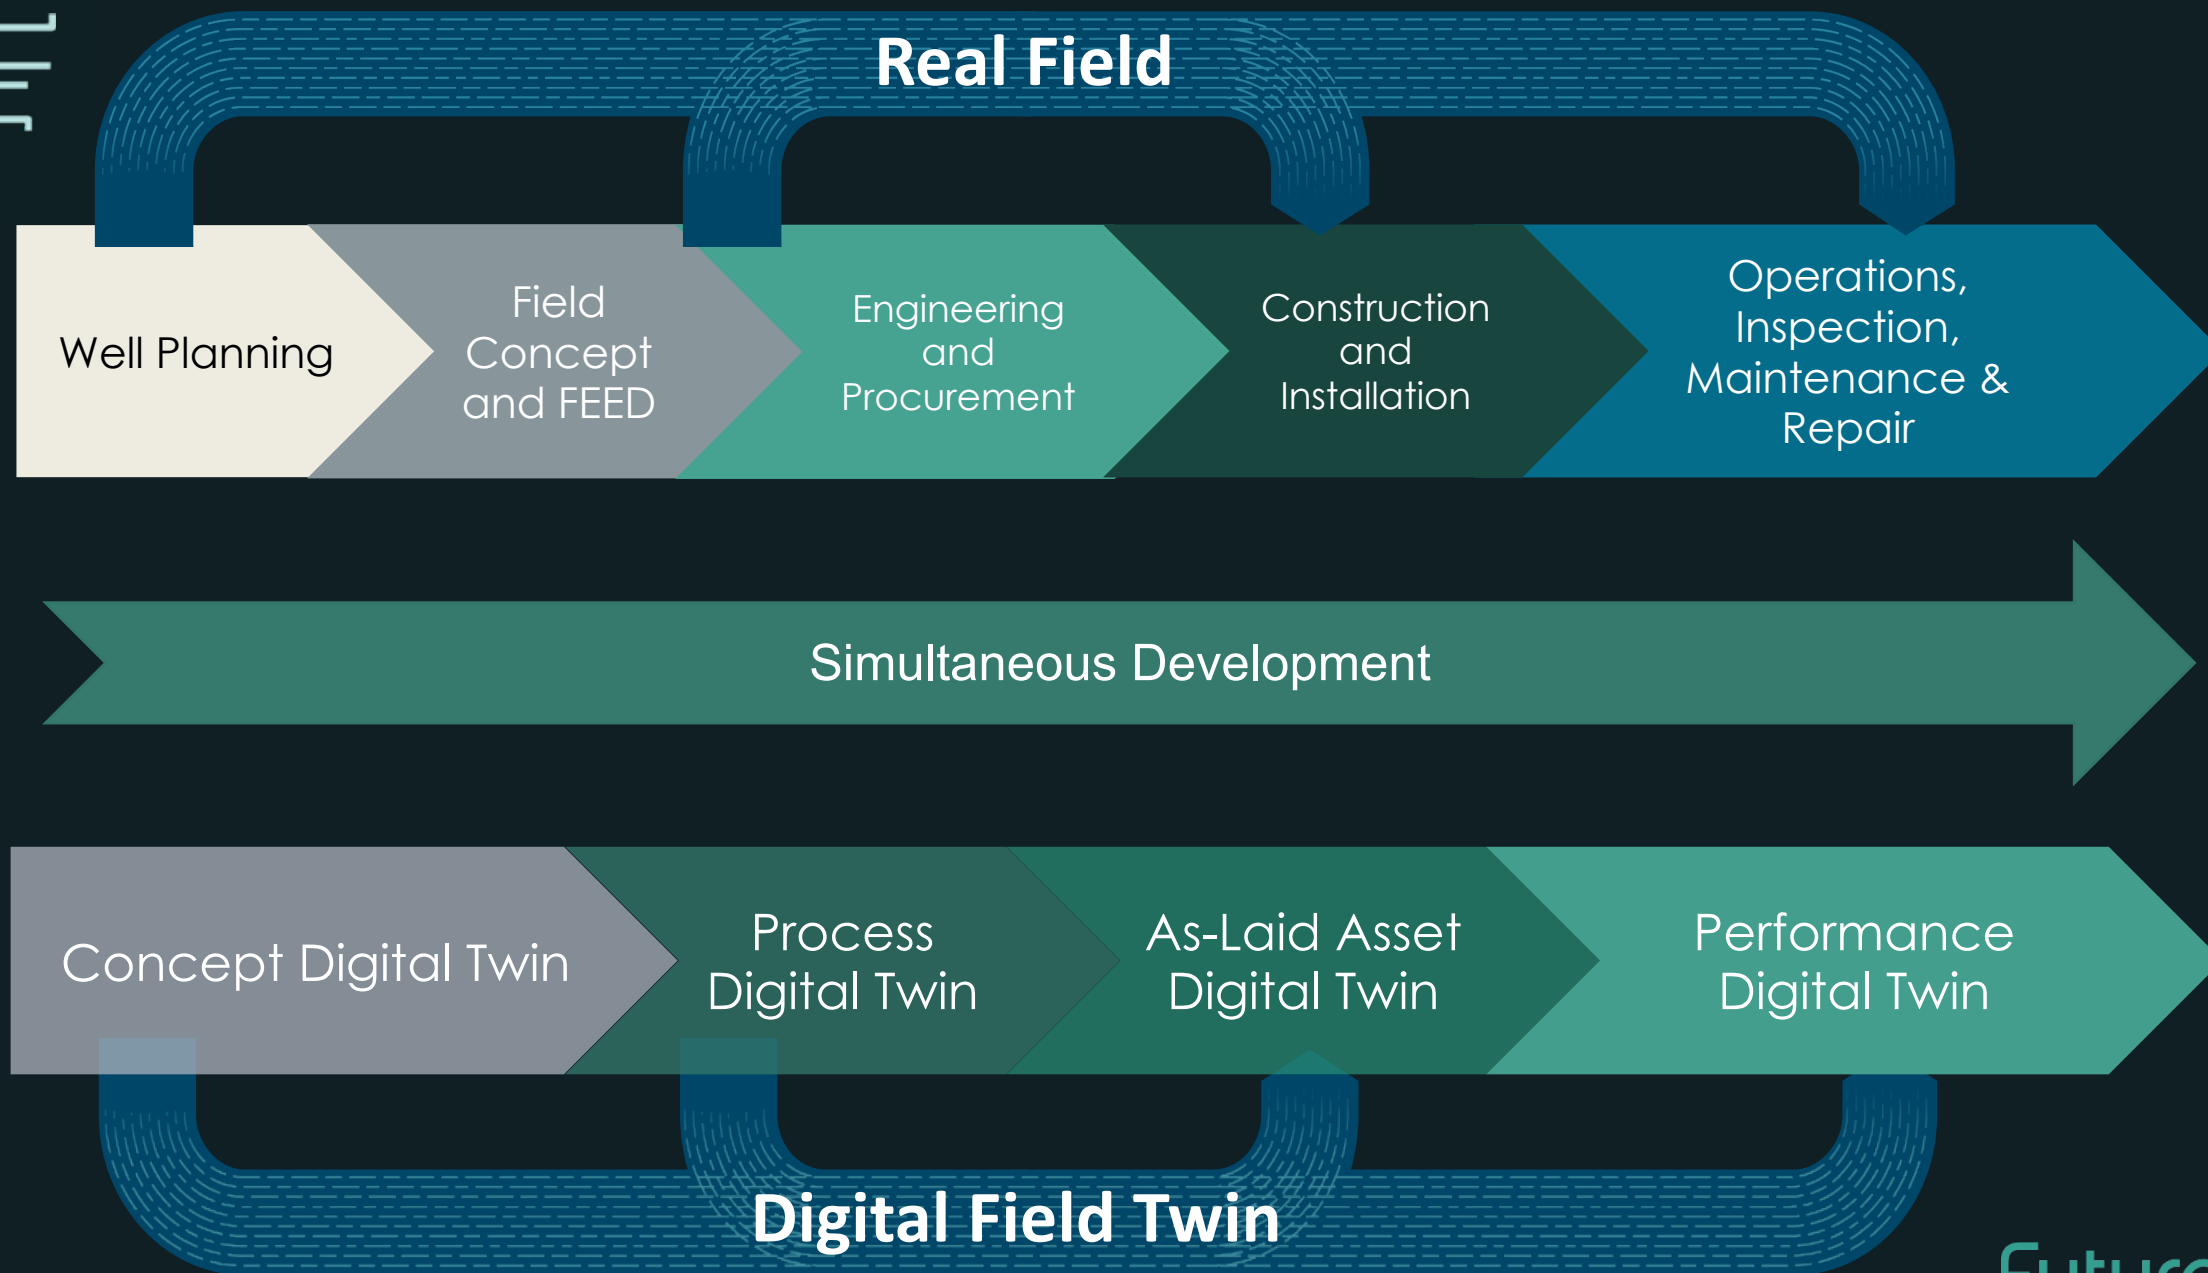

- Single Source of the Truth
- Secure & controlled access

## Increase Efficiency

- Centralized cloud storage of all engineering data
- Real-time insight from IoT and sensors

## DATA DRIVEN DESIGN

Use Meta-Data to build or link your own data model to your private Asset Library or use the Generic library for equipment and costing options while designing the field.

## META DATA EDITOR

Easy to use UI allows you to define your various equipment configurations and options and link them to your VendorID, WBS, cost specifications etc.

## ATTRIBUTES

Wide range of data types, units, and input options for user selection on assets, connectors and connections.

## REST API

Populate, update, edit or delete the assigned attributes programmatically with your own data from your backend system to integrate with your workflow.
