

# LOAN MANAGEMENT APPLICATION

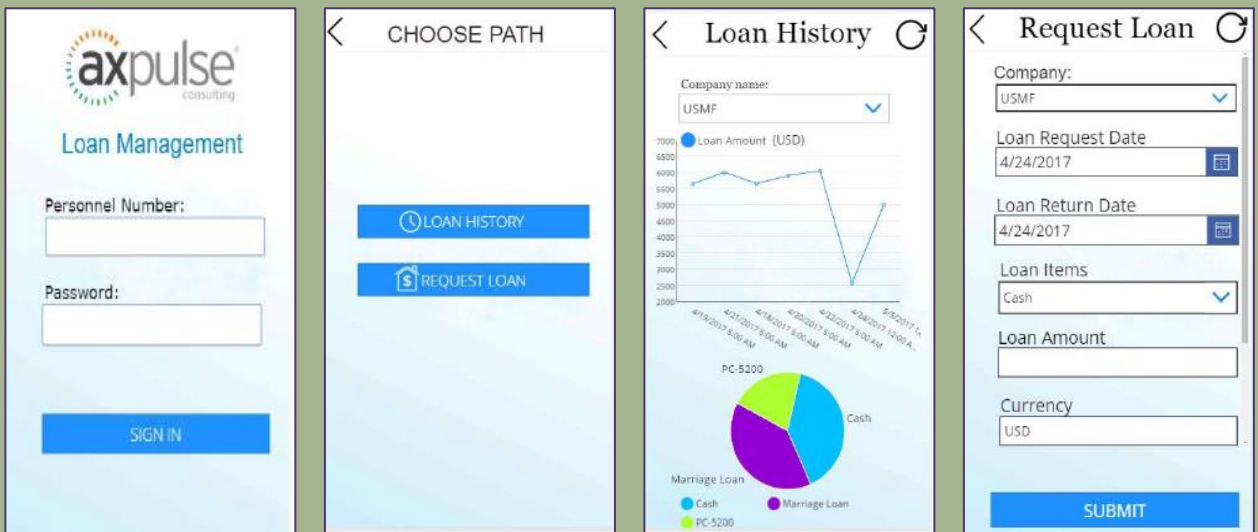

Loan management provides 360 degree view of all type of loans provided to employees. The application is integrated in such a way that it helps users to:

1. Request for loan.
2. View payment schedule
3. View payment history

The app is for employees awarded with many loan items (laptop, Internet devices or even cash). Loan management is tightly integrated with Microsoft Dynamics AX technologies.

Power Apps is considered to be one of the best tool to provide data visualization. Considering the power of this technology, AXPulse created many pie chart to show the mix of loan awarded by company and line graph to view the history of all loan cases.

AXPulse is a global innovative technology consultancy that enables you to transform your organization and improve performance by adopting the world class Microsoft technologies. We aim to empower organizations to respond quickly to changing market dynamics using Microsoft technologies adoption.
