KEY CAPABILITIES

Security and compliance are top of mind for executives in all organizations. It is a continuous challenge to secure the expanding attack surface and stay ahead of motivated threat actors and ever changing regulations. Microsoft EMS provides an effective platform to help protect against advanced threats, personal data from loss, unauthorized access, or disclosure. Additionally, EMS helps customers comply with the new standards of transparency, accountability and record keeping.

SoftwareONE Security for Microsoft 365 helps customers accelerate and realize the full benefits of EMS.

Azure Active Directory

Manage identities from on-premises to cloud and control access to applications based on centralized policy and rules.

Cloud Application Security

Discover and extend enterprise grade security to SaaS applications.

Microsoft Intune

Manage mobile devices and protect access to corporate applications, data and resources.

Windows Defender

Protect Windows Endpoints against viruses, spyware and other malicious software.

Azure Advanced Threat Protection

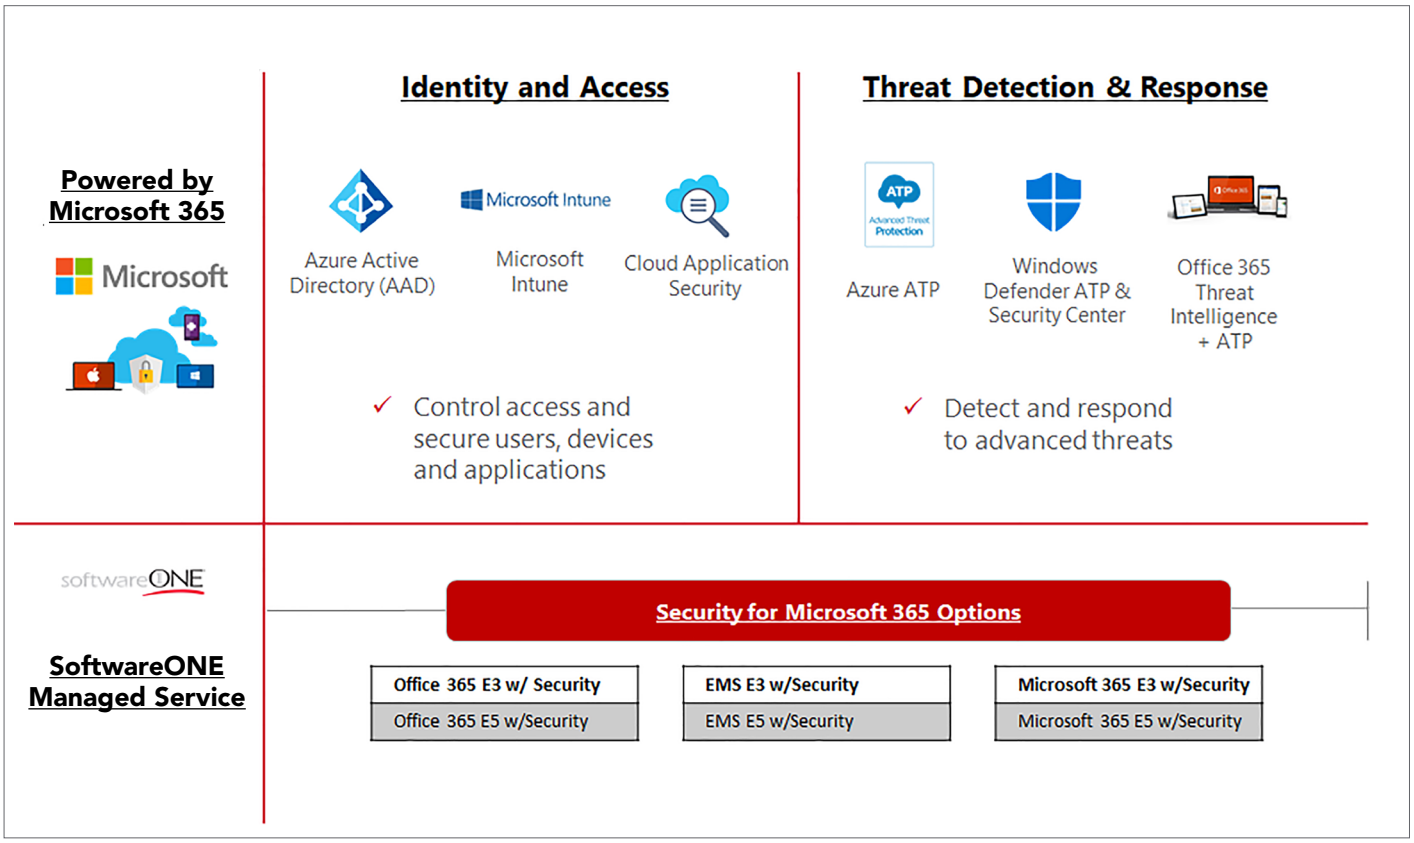
Detect and protect against advanced targeted attacks and insider threats.

Office 365 Threat Intelligence + Advanced Threat Protection

Detect and protect against advanced threats in Office 365 environments.

MANAGED SECURITY SERVICE

SoftwareONE Security for Microsoft 365 is a fully managed service. SoftwareONE Security Operation Center (SOC) continuously monitors the customer environment, enabling organizations to effectively respond to security incidents. Security for Microsoft 365 helps customers stay ahead of threats and protect their Microsoft 365 environment, users, devices, applications and data.



There are several options available as shown above – Office 365, Microsoft 365 and EMS. Customers have the flexibility to choose the option that best suits their business, security and compliance requirements.
