Work and Learn in a Meaningful Combination

Work-based learning gets a new and more comprehensive meaning with XoomPoint services. Learning is an integrative part of work. Many work and learning related challenges can be overcome in a common environment, which is always available.

Learning management is efficient and easy with XoomPoint's solutions. There is a comprehensive and easily customizable reporting model for monitoring the progress of the learning process and the learners. The model provides easily interpretable information about the state of learning in the organization.

Combine Tools, Content and People

FlowLMS is role based and it combines diverse tools, content and reporting to a consistent learning environment. FlowLMS unites learners, trainers, administration and other stakeholders - even from multiple organizations.

Regardless of time, place and device

FlowLMS uses the most advanced technologies utilized by the businesses and public sector worldwide. It is accessible regardless of time, place and device. It supports any device with Microsoft Edge, Internet Explorer, Safari, Firefox or Chrome browsers. Whether you use Mac, iPad, iPhone, Android or Windows, you are all set!

Integrated Reporting

FlowLMS Reporting Services produce reports about the progress of the training courses and trainees. Open interfaces allow the resulting data to be transferred to other corporate backbone systems, such as SAP.

Single Sign-On

FlowLMS integrates with your identity management providing a smooth single-sign-on. No need for tedious additional user management. Just use it.

Business e-Learning Content - Tailored for your Success

FlowContent e-Learning courses support companies and organizations in training their employees efficiently and effectively. Our wide-ranging solutions make knowledge and skills development into a clear and measurable action that is easy to carry out without having to make extensive changes to normal work routine. They can be used independently, with any Learning Management Systems, such as our FlowLMS - or integrated with classroom teaching.

Rich media with inspiring narratives

Our production concept process creates highly customized e-Learning solutions. It enriches the client's message by spicing it up with pedagogically effective methods and inspiring media narrative. Conceptualized production guarantees our client a clear and easy process, and it receives constant praise from our clients.
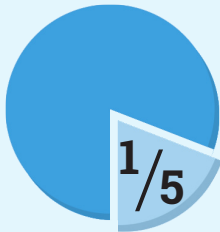

Full compatibility

We have a long and wide-ranging experience in all common learning technologies and standards used to track learning. Our courses can be installed also in any other LMS or web environment, either as standard SCORM packages, equipped with a customized tracking solution, or as such without any student performance tracking. Updating our courses can be done easily using the XoomPoint standard production tools.

FlowLMS Benefits

Cost benefits when training 25,000 persons with FlowLMS compared to classroom teaching.

Planning and administration
