5. High value to top management
6. Within your budget & time

SystemEver
Making your business better

Contemporary Technology

- MS Azure® dispenses with IT facilities and personnel.

- K-Studio®, metadata-based development tools, make it easy to develop, test, and deploy programs.

  - It allows OSMU (one-source, multi-use).

  - Thru PC, web and mobile, same screen can be accessed.

- Stitch®, our interface hub, allows easy connectivity with other systems; bar-code, PDA, MES, POS, GW, or bank/tax reporting system.

OSMU (one-source, multi-use)

Once programmed by K-Studio®, both Web and mobile share the same screen.

Latest Technology: Various Devices

K-Studio® supports various devices such as PC, mobile, web etc with one program

PC
Application

Web

• Intuitive and easy to use UI designer

• Integration of ERP systems and development tools eliminates

the need for complex installation procedures

• it support metadata change and debugging in ERP system

• It improved development productivity by importing existing programs

Speedy Operation

- Real-time, modular processes are connected seamlessly.

- Operational processes are integrated with administrative processes.

- Automatic journal and Jump button lead to the next step automatically.

- Customer-tailored report forms make output professional.

  * Operational processes: sales, purchases, logistics, manufacturing, inventory, etc

  * Administrative processes: accounting, HR, payroll, etc

- Visual Consultant-K®, our process maps, enables users to learn SystemEver® with no trouble.

  - It provides over 40 process maps for learning and customizing.

  - It hyperlinks to relevant program screens.

- Everball®, our supporting tool, makes it easy to find instructive contents.

  - Customers may add firm-specific materials.

Visual Consultant-K®

Users customize over 40 process maps for their situation.

EverBall®

Everball® makes it easy to arrange instructive contents.
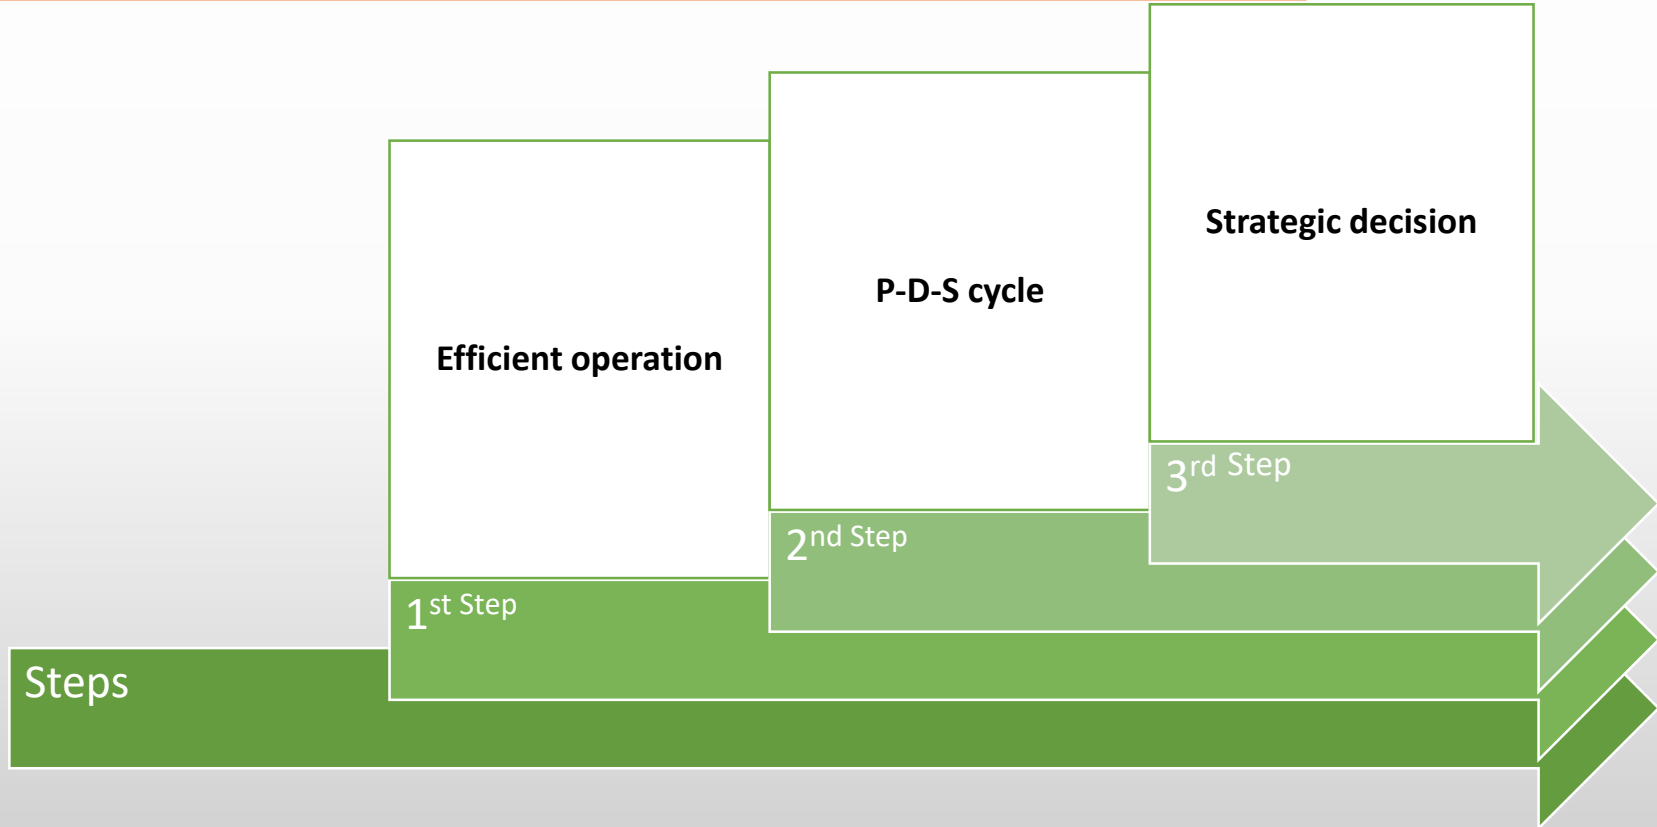

Step-by-step Improvement

- According to users' capability, SystemEver® can be implemented gradually.

- We provide three-step groupings for beginners, matures, and sophisticated users.

- Customers will add modules as experienced or business extension.

Three -step Groupings

High Value to Top Management
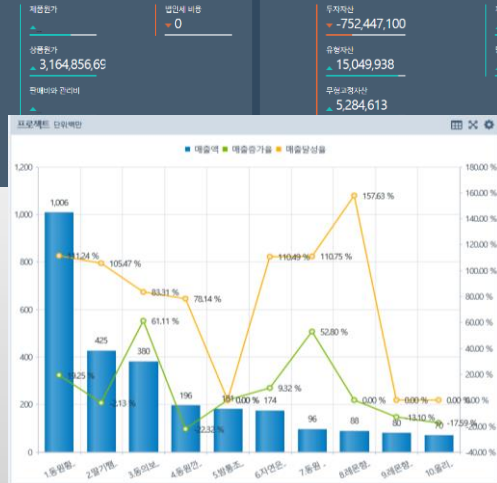

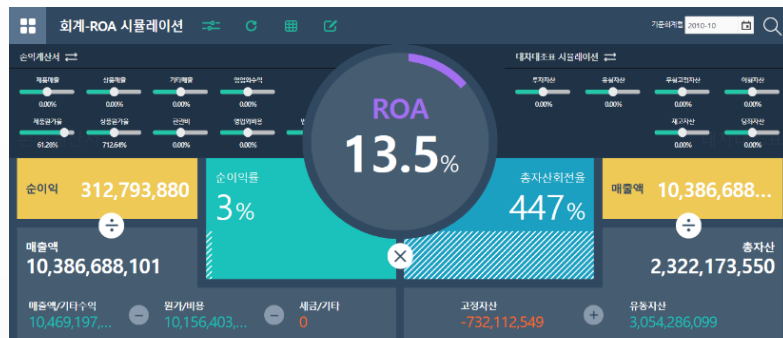

- BI (Business Intelligence) and EIS make you more powerful with better analytical and forecasting capability.

- Short closing time provides information of cash flow or profit quickly enough for actions.

  - Activity-based costing provides accurate cost information.

  - Divisional profitability can be analyzed without re-calculation.

High Value to Top Management

- TCO of SystemEver® is much more attractive than comparable on-premise ERP.

  - SystemEver's pay-per-use billing scheme provides flexible cash flow management.

  - SystemEver's monthly payment is only as much as maintenance cost charged by on-premise.

- You can start SystemEver® readily with our 20-day consulting methodology.

Comparison of Payment

	SystemEver	**Comparable On-premise**
Membership Fee	U$2,000	U$50,000~100,000 (license fee)
Monthly payment	U$600~1,500 per module/level use	U$1,000~2,000 per maintenance contract
HW/NW/Security Cost	U$130 per month (Cloud fee)	Separate purchase
Consulting Period	20 Man/Day standard	Over 3Man/Month
Customization	Limited	By request
IT Professional	Not required	required

Cases: on-time Installation

Customers	Industry	Consulting Period	Remarks
D Food	Food producer	29 Man/Day	
V Tech	Motor producer	17 M/D	29 M/D planned
G Cosmetic	Cosmetic producer	20 M/D	
T Co.	Machine producer	32 M/D	
G Co.	Molding	15 M/D	20 M/D planned

- Target customer: small and medium-sized firms

  - Less initials, and step-up investment afterward.

  - More standardized and less customization.

  - Pay-per-use according to budget, level and needs.

- Cloud technology allows scalability and high security.

  - Easy interface and quick connectivity with other systems.

  - Wherever to access thru web and mobile.

 - From efficient operation gradually toward strategic decision.
