decisyon®

EXECUTE WITH CONFIDENCE

Using our Collaborative Application PaaS in Complex Industrial Environments

Built-in Industrial Automation Capabilities

Decisyon App Composer™ (DAC) is designed from the ground up to provide all of the functionality you need to create industrial scale production applications and then modify them as your business evolves.

Agnostic and Flexible IoT Platform

Create and customize your app and deploy in any IaaS (Azure, AWS, private cloud), using our container-based architecture. You can leverage microservices from different platforms and integrate your Industrial app with third party apps and functionality using our extend GUI for managing third parties' APIs.

Advanced Collaboration and Execution Functionality

Built-in execution capabilities like business rules, in-context collaboration, workflow, and decision trees technology improve user experience and accelerate decision making in uncertainty.

Ready to Use Factory Solutions

Stay ahead of the competition using Decisyon's pre-built solutions to aggregate, visualize, analyze and activate data. You'll improve your operations in real time, and uncover new opportunities and revenue, instead of spending weeks and months custom coding solutions.
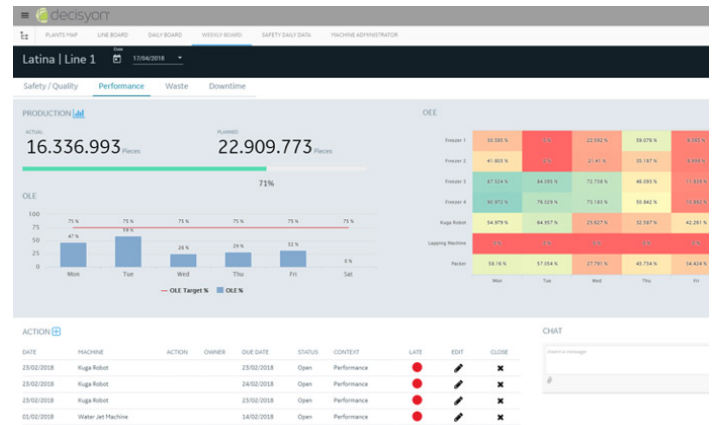

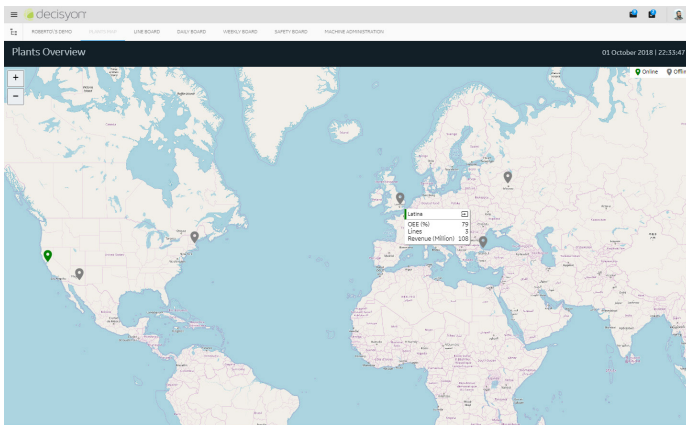

50% MVP ACCELERATION

DAC DRASTICALLY ACCELERATES MVP AND SOLUTIONS CREATION FOR ANY IIOT PAAS.

10% ONLY CUSTOM CODING
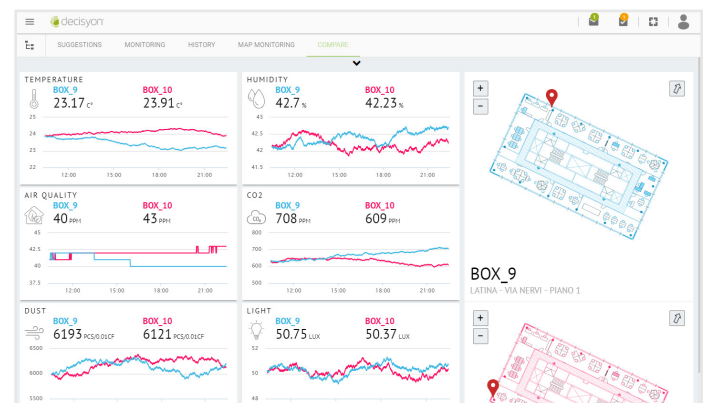

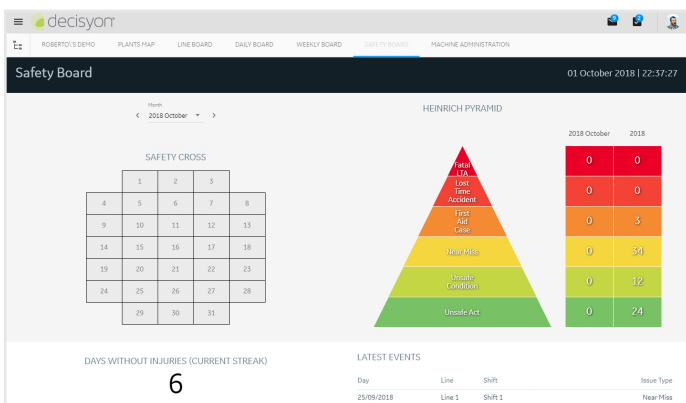

REDUCING COST FOR MAINTENANCE, UPGRADE AND ROLL-OUT
